PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **machine learning models** in production environments, applying **OLS** and **clustering techniques** to analyze large datasets for a global payments technology organization.
- Engineered **Python** data pipelines and ETL processes to cleanse, structure, and manage complex data sets, supporting downstream analytics for strategic business decisions.
- Designed and built **Power BI dashboards** and reports, translating complex analytical findings into clear, business-focused outcomes for senior stakeholders.
- Applied advanced statistical techniques, including **multinomial logistic regression** and **segmentation**, to conduct exploratory data analysis and identify actionable insights.
- Collaborated with cross-functional teams to gather requirements and ensure analytical solutions met business needs, facilitating effective communication between technical and non-technical stakeholders.
- Managed **Python scripting** for automation and scheduled reporting, contributing to the development and maintenance of scalable, data-enabled solutions within enterprise systems.

SKILLS

Programming & ML – Python, R, Scikit-learn, TensorFlow, PyTorch, Machine Learning, Deep Learning, Artificial Intelligence, Generative AI, Agentic AI.

Data Processing & Big Data – SQL, Databricks, Spark, Hadoop, ETL.

Analytics & BI – Power BI, DAX, Data Modelling, Power Query, Tableau, RStudio.

Core Engineering – Java, Spring Boot, REST APIs, Docker, Linux, Git, Jenkins.

Cloud & Observability – AWS (EC2, S3, Lambda, CloudWatch), Splunk, Dynatrace.

Methodologies – Agile, Scrum, Change Management.

PROJECTS

Customer Transaction Analysis Platform

- Developed a **Python**-based analytical platform on **AWS Lambda** to process and analyze high volumes of customer transaction data, enabling real-time insights.
- Implemented **SQL** queries and data transformations for extracting and structuring transaction logs from **PostgreSQL**, preparing data for analytical models.
- Created interactive **Power BI dashboards** to visualize transaction patterns, identify key customer segments, and track performance metrics for business analysts.

Financial Operations Dashboard Enhancement

- Enhanced an existing **Java Spring Boot** application by developing new REST APIs for integrating operational data into a financial services dashboard.
- Wrote **Python** scripts to automate data validation checks and generate scheduled reports on payment processing workflows, reducing manual effort by approximately 15%.
- Collaborated with business analysts to define requirements for transaction monitoring features, ensuring alignment with operational needs and audit trail compliance.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
