PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and built **AI-assisted triage tooling** using Python to pre-classify bug bounty reports, flagging duplicates and routing valid issues to engineering teams with reproduction context.
- Developed **LLM-backed copilots** and Slack bots that aggregate alert context and correlate signals across SIEM and log sources, reducing investigation time by an average of **40%**.
- Scripted automation for **threat response workflows** in Python, drafting remediation steps and generating evidence artifacts to track issue closure across teams, improving SLA adherence by **15%**.
- Monitored and responded to **EDR and cloud security alerts**, performing containment and detailed documentation for security incidents within a global financial services environment.
- Analyzed **darkweb findings** and credential exposures, contributing to the development of proactive darkweb monitoring practices and tooling for the security operations program.
- Supported audit evidence collection for **SOC 2 and ISO 27001** compliance by documenting security processes and verifying remediation efforts for critical vulnerabilities.

SKILLS

Security Operations – Triage, Vulnerability Management, Threat Response, Incident Response, EDR, SIEM, DLP, Bug Bounty Triage, Darkweb Monitoring, Detection Engineering

AI/ML & Automation – LLM Agents, RAG Pipelines, Slack Bots, Prompt Engineering, AI Security Tooling, Python Scripting, Bash Scripting, OpenAI, Anthropic

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), GCP, Linux, Docker, Kubernetes, Cloud Security

Development & Tooling – Python, Java, Spring Boot, REST APIs, Git, Jenkins, CI/CD, FastAPI, Flask, PostgreSQL, MySQL, Oracle

Compliance & Governance – SOC 2, ISO 27001, PCI DSS, GDPR, Audit Evidence Collection

PROJECTS

AI-Powered Security Triage Automation (HCL Technologies)

- Developed a Python-based AI agent to automate the initial triage of incoming vulnerability reports, classifying them as duplicate, spam, or valid issues with an accuracy of approximately **88%**.
- Integrated the triage agent with Slack and Jira, automatically creating tickets for valid vulnerabilities and notifying relevant engineering teams, reducing manual routing effort by **30%**.
- Built a RAG pipeline to provide relevant context from internal documentation and past incidents to the AI agent, improving its ability to accurately assess and route complex security findings.

Security Incident Investigation Copilot (HCL Technologies)

- Engineered an investigation copilot using Python and LLM APIs to pull contextual data from SIEM and EDR alerts, correlating signals and surfacing key information for security analysts.
- Designed prompt engineering strategies to elicit concise and actionable summaries from the copilot, cutting down the time spent on initial alert analysis by an estimated **25%**.
- Implemented a feedback mechanism within the tool to refine LLM responses based on analyst input, improving the relevance and accuracy of the generated investigation summaries over time.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
