## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Python** scripts to automate data extraction and transformation processes for financial reporting, reducing manual effort by approximately **15 hours** per cycle.
- Designed and implemented **Java Spring Boot** REST APIs for internal services, facilitating seamless data exchange and improving system integration efficiency.
- Managed production incidents and SLA adherence for enterprise applications, conducting root cause analysis and implementing fixes within defined response times for critical P1/P2 issues.
- Engineered **Python** data pipelines on **AWS Lambda** to process and load transactional data into a data warehouse, handling up to **3,500 events** per second during peak hours.
- Collaborated with business analysts and operations teams to gather requirements for enhancements to a financial-services dashboard, ensuring alignment with business needs and regulatory awareness.
- Wrote and optimized **SQL** queries across **PostgreSQL** and **MySQL** databases for data validation, reporting, and schema updates, supporting critical operational workflows.

## SKILLS

**Languages** – Python, Java, SQL, R

**Frameworks & Libraries** – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

**Cloud & DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

**Databases** – PostgreSQL, MySQL, Oracle

**BI & Analytics** – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing

**Tools & Methodologies** – Jira, Confluence, Splunk, Dynatrace, Agile/Scrum

## PROJECTS

### Automated Transaction Reconciliation System (HCL Technologies)

- Developed a **Python**-based system to automate the reconciliation of financial transactions from disparate sources, integrating with **PostgreSQL** and producing daily reconciliation reports.
- Implemented automated alerting for reconciliation discrepancies, reducing the manual review time for exceptions by an estimated **30%** and improving the speed of issue resolution.
- Designed and built a dashboard using **Power BI** to visualize reconciliation status and key metrics, providing operational teams with real-time insights into transaction matching.

### Real-time Payments Monitoring Dashboard (HCL Technologies)

- Engineered a **Java Spring Boot** application to ingest and process real-time transaction data, providing operational visibility into payment flows for a financial-services client.
- Integrated with **Splunk** for log aggregation and analysis, enabling proactive identification of transaction processing issues and contributing to a **20%** reduction in critical alerts.
- Developed RESTful APIs to expose transaction status and operational metrics, supporting downstream reporting and analysis tools used by business stakeholders.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
