PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Prepared comprehensive financial statement analyses and developed detailed financial models for a portfolio of **corporate banking clients** within the Power, Utilities, and Infrastructure sector.
- Supported transaction structuring and execution efforts by gathering and consolidating **company and industry data**, contributing to the successful closing of multiple financing deals.
- Collaborated with Associates and Directors to manage client relationships, developing targeted **marketing materials and presentations** that highlighted tailored financial solutions.
- Evaluated and analyzed the financial needs of prospective corporate clients, identifying and developing new **business opportunities** that aligned with the bank's strategic objectives.
- Implemented production support and monitoring for enterprise **Java Spring Boot applications** using **Splunk** and **Dynatrace**, ensuring adherence to critical SLAs for financial operations systems.
- Automated data extraction and reporting tasks using **Python scripting**, reducing manual effort for the operations team by approximately **15%** and improving data accuracy.

SKILLS

Financial Analysis & Modeling – Financial Statement Analysis, Financial Modeling, Data Analysis, Company & Industry Data Interpretation

Corporate Banking & Client Relations – Client Relationship Management, Business Development, Marketing Materials, Presentation Development, Transaction Structuring

Software Engineering & Support – Java, Spring Boot, REST APIs, Python, SQL, PostgreSQL, AWS, Docker, Linux, Git, Jenkins

Operations & Monitoring – Production Support, Incident Response, SLA Management, Splunk, Dynatrace, CloudWatch, Operational Alerting

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Warehousing, Business Intelligence

PROJECTS

Corporate Client Financial Health Assessment Platform (HCL Technologies)

- Developed a Python-based application to consolidate financial data from multiple sources (SQL databases, CSV files) for **enterprise clients**, enabling more efficient analysis.
- Engineered automated data validation routines using **SQL** and **pandas** to ensure data integrity for financial reporting, catching approximately **90%** of input errors.
- Built interactive dashboards using **Power BI** to visualize key financial metrics and trends, facilitating quicker decision-making for internal stakeholders and client-facing teams.

Automated Payment Reconciliation Workflow (HCL Technologies)

- Designed and implemented a **Python**-driven workflow to automate the reconciliation of transaction data between internal systems and client reports, processing ~5,000 records per batch.
- Integrated with **PostgreSQL** and **Oracle** databases to extract and compare transaction details, identifying discrepancies that previously required manual review.
- Created shell scripts for automated job scheduling via **cron** on Linux servers, ensuring timely execution of the reconciliation process.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
