PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed the configuration and maintenance of **electronic interfaces** for outbound data exchange from internal applications, ensuring adherence to business instructions and addressing post-implementation discrepancies.
- Investigated and resolved errors for **standard extracts** (Spos 4x, Standard Trade, Taxlot), providing level one support and troubleshooting file generation or data issues for internal Operations and Client Integration teams.
- Collaborated with Client Integration teams to design and implement new standard **Spos/STRD/Taxlot extracts**, facilitating effective data flow for client reporting needs.
- Contributed to the retirement and decommissioning of legacy reports that were no longer required, streamlining the reporting landscape and reducing system complexity.
- Developed **Python scripts** to automate scheduled reporting tasks and data extraction processes, improving operational efficiency by an estimated 15% through reduced manual effort.
- Provided production support for enterprise applications, including monitoring with **Splunk** and **Dynatrace**, managing SLAs, and responding to P1/P2 incidents within a financial services context.

PROJECTS

Automated Transaction Reconciliation Reporting (HCL Technologies)

- Developed a **Python-based reporting tool** to automate the generation of daily transaction reconciliation reports, processing approximately 50,000 records per run.
- Integrated the tool with PostgreSQL to extract relevant data, ensuring accuracy and consistency for financial operations teams.
- Implemented error handling and logging mechanisms, reducing manual reconciliation effort by an estimated 20 hours per week.

Enhanced Client Data Extract Service (HCL Technologies)

- Designed and implemented a new service using **Java Spring Boot** to provide customized outbound data extracts for key enterprise clients.
- Configured REST APIs for secure data retrieval, supporting a peak load of 500 requests per hour.
- Collaborated with business analysts to gather requirements, ensuring the extracts met specific client data needs and regulatory awareness.
