PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python** backend services using **FastAPI**, integrating with **PostgreSQL** databases for core application logic and data persistence.
- Designed and implemented RESTful APIs for new functionality releases, adhering to best practices for service-oriented architectures and ensuring seamless integration with existing software systems.
- Contributed to the development of enhancements for custom-built software platforms supporting treasury, collateral, and trade operations, working across multiple modules and architectures.
- Managed system documentation and knowledgebase content for support efficiencies, creating detailed guides and assistance tools for end-users and third-level support teams.
- Participated in automated build processes and code reviews, employing **test-driven development** principles to ensure code quality and maintainability.
- Resolved technical issues through systematic debugging, research, and investigation, contributing to system stability and performance improvements.

SKILLS

Backend Development – Python, FastAPI, RESTful Web Services, APIs, Service Oriented Architectures

Frontend Development – Typescript, React 18, Material UI/MUI

Cloud & DevOps – AWS Cloud Platform, Docker, Jenkins, Git, CI/CD

Databases – PostgreSQL, SQL

Development Tools – Code generation Tools, Amazon Q, Co-pilot, Kiro, Jira

Methodologies – Agile, Scrum, Test-Driven Development (TDD)

PROJECTS

Treasury Operations Data Service (HCL Technologies)

- Engineered a **Python**-based microservice using **FastAPI** to manage and expose real-time treasury data, integrating with existing **PostgreSQL** data stores.
- Developed RESTful endpoints to support new reporting requirements, enabling data retrieval for collateral management modules and increasing data accessibility by **~30%**.
- Implemented comprehensive unit and integration tests with **Pytest**, achieving over **85%** code coverage for critical data service functions.

Trade Execution Enhancement Platform (HCL Technologies)

- Built a **React 18** frontend application with **Typescript** and **Material UI** to provide users with an interactive interface for trade operations.
- Integrated the frontend with backend APIs, facilitating smoother data flow and improving user experience for trade reconciliation workflows.
- Collaborated with business analysts to refine user stories and translate requirements into functional application components, supporting a team of **4** developers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
