PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices for a financial-services client's operations dashboard, implementing new features and resolving production defects, contributing to a system supporting ~3,200 failed payments per week.
- Automated data extraction and transformation tasks using **Python scripting**, building ETL pipelines that reduced manual reporting effort by approximately 15 hours per sprint.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, performing root cause analysis and implementing fixes within strict SLA targets.
- Designed and implemented REST APIs in **Java Spring Boot** for cross-system integrations, facilitating data exchange between core banking modules and operational platforms.
- Refactored inefficient relational database queries and implemented strategic indexing in **PostgreSQL**, decreasing average analytical report execution times by 34% for key ERP data.
- Collaborated with business analysts and operations teams to gather requirements for system enhancements, coordinate UAT, and provide post-go-live support across interconnected enterprise systems.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Python, Flask, FastAPI

Frontend Development – React, Angular

Databases & Data Warehousing – SQL, PostgreSQL, MySQL, Oracle, DynamoDB, Data Modelling, DAX, Power Query

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Apache Pulsar, Apache Camel, Kubernetes, ECS

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

Analytics & BI – Power BI, Tableau, R, RStudio, pandas, NumPy, scikit-learn

Methodologies & Tools – Agile, Scrum, Jira, Confluence, Linux, Shell Scripting

PROJECTS

Payments Processing Platform Enhancement (HCL Technologies)

- Engineered **Python** data pipelines to ingest and transform transaction data from disparate sources into a unified format for an enterprise client's payments operations dashboard.
- Developed **Java Spring Boot** components to enhance real-time transaction monitoring capabilities, enabling faster identification of anomalies and reducing manual reconciliation efforts by 20%.
- Implemented automated data validation checks and alerting mechanisms within the **PostgreSQL** database to ensure data integrity and compliance with operational requirements.

Interactive Financial Analytics Dashboard (MSc Capstone)

- Designed and developed an interactive **Power BI** dashboard visualizing key performance indicators for financial transaction flows, consolidating data from multiple sources using **Power Query**.
- Created complex **DAX** measures to support drill-down analysis and trend identification, presenting actionable insights to stakeholders that informed strategic operational adjustments.
- Performed exploratory data analysis using **Python** (pandas, NumPy) on a dataset of ~50,000 financial transactions to identify patterns and outliers before dashboard development.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
