+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engineered and maintained scalable **Java** applications using **Spring Boot**, contributing to the full development lifecycle including design and feature implementation.
- Developed and deployed **REST APIs** for cross-service data exchange, ensuring robust communication between interconnected enterprise systems.
- Automated data extraction and transformation processes using **Python** scripting, enabling efficient ETL workflows for scheduled reporting and data analysis.
- Managed production incidents and SLA adherence for enterprise applications, performing root cause analysis and implementing corrective actions within a **Linux** environment.
- Optimized relational database queries and performed schema modifications across **PostgreSQL** and **Oracle** databases to support application requirements.
- Participated in **Agile** ceremonies including sprint planning and code reviews, collaborating with cross-functional teams to deliver high-quality software.

SKILLS

Core Java – Java, Spring Boot, Hibernate, Java EE, OOP, Design Patterns, Architectural Principles

Databases – MySQL, Oracle, MS SQL Server, PostgreSQL, NoSQL, MongoDB, DynamoDB, Cosmos DB

Development Tools – Git, Jenkins, Docker, Kubernetes, Jira, Confluence

Languages – Java, Python, SQL, HTML, CSS, JavaScript

Cloud & DevOps – AWS, CI/CD, DevOps

Methodologies – Agile, Scrum, Kanban, Problem-Solving, Debugging, Communication

PROJECTS

Enterprise Payments Processing System Enhancement

- Developed new Java Spring Boot microservices to process and monitor financial transactions, integrating with existing backend systems.
- Implemented robust error handling and logging mechanisms using **Splunk** and **Dynatrace**, reducing critical incident response time by 18% for the payments dashboard.
- Collaborated with business analysts to define requirements for transaction reconciliation workflows, ensuring data integrity and audit trail compliance.

Automated Data Ingestion Pipeline for Financial Reporting

- Created a Python-based ETL pipeline to ingest and transform data from multiple sources (SQL databases, flat files) into a centralized data warehouse.
- Wrote SQL scripts for data validation and quality checks, ensuring accuracy for downstream analytical reports and operational dashboards.
- Deployed and scheduled the pipeline using **Jenkins** and **cron jobs** on AWS EC2 instances, processing approximately 50,000 records daily.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
