PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided first and second-line support for business-critical **ERP systems** and **project management tools**, resolving an average of 15 tickets daily within SLA targets.
- Managed software installations and configuration updates for core business applications, coordinating UAT and post-go-live support across interconnected systems.
- Developed **Python scripts** to automate data extraction for scheduled reporting and ETL processes, reducing manual data compilation time by approximately **40%** for the operations team.
- Designed and implemented **Power BI dashboards** and **SQL queries** to visualize key operational metrics, improving decision-making speed for engineering and project delivery teams.
- Collaborated with engineering teams to understand workflows and recommended **process automation** opportunities, including the development of a new reporting template that streamlined data analysis.
- Maintained technical documentation, including **FAQs** and **user guides**, for deployed software tools, supporting a **15% reduction** in common user-reported issues.

SKILLS

Core Technologies – Python, Java, SQL, Spring Boot, JavaScript, React, ASP.NET, Django, C#

Systems & Cloud – AWS (EC2, S3, Lambda, CloudWatch), Linux, Docker, PostgreSQL, MySQL, Oracle, Jenkins, Git

Business Applications – ERP Systems, CAD Software Integrations, Project Management Tools, Financial Platforms, HR Platforms

Data & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, SQL Queries, R, pandas, NumPy

Operations & Support – Software Support, Systems Administration, Process Improvement, CI/CD Pipelines, Change Management, IT Audits, GDPR Compliance, Splunk, Dynatrace

Methodologies – Agile, Scrum, Lean Engineering, Continuous Process Improvement

PROJECTS

Automated Reporting Framework for Engineering Operations

- Developed a Python-based framework to automate the generation of daily operational reports from disparate **ERP and project management systems**, replacing a manual 4-hour process.
- Integrated **SQL queries** against PostgreSQL and Oracle databases to extract and aggregate data, ensuring data accuracy and consistency for reporting outputs.
- Created parameterized **Power BI dashboards** to visualize key performance indicators, enabling operations teams to monitor project progress and resource allocation more effectively.

Internal Tooling for CAD Data Interoperability

- Built a **Python script** to parse and extract metadata from **CAD files** (simulated using file structures), facilitating easier data searching and cataloging.
- Designed a REST API using **Flask** to serve extracted metadata, allowing other internal systems to query and integrate with CAD data without direct file access.
- Documented the API endpoints and data formats, providing clear usage instructions for engineering teams integrating the tool into their workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
