PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Python** scripts to automate data extraction and transformation for energy consumption analysis, processing approximately 1.5TB of historical data.
- Contributed to the development of a **Java Spring Boot** REST API for integrating energy sensor data streams, ensuring efficient data ingestion and real-time processing capabilities.
- Performed production support for enterprise applications on **AWS**, monitoring system health using **Splunk** and **CloudWatch**, and resolving P1/P2 incidents within defined SLAs.
- Developed and maintained **SQL** queries and stored procedures for data validation and reporting on energy usage patterns, supporting operational insights for a financial-services client.
- Collaborated with cross-functional teams to gather requirements and support User Acceptance Testing (UAT) for system enhancements in an Agile/Scrum environment.
- Authored technical documentation and runbooks for new feature deployments and incident response procedures, improving team knowledge transfer by an estimated **20%**.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI & Data Analysis – Power BI, Tableau, DAX, Power Query, Data Modelling

Monitoring & Observability – Splunk, Dynatrace

Methodologies – Agile, Scrum

PROJECTS

Energy Consumption Analytics Platform (MSc Project)

- Developed a data analytics pipeline using **Python** (pandas, NumPy) to ingest and clean heterogeneous energy consumption datasets from multiple sources.
- Built interactive **Power BI** dashboards and reports to visualize energy usage trends, identify anomalies, and present key performance indicators to academic stakeholders.
- Applied statistical methods and **R** for exploratory data analysis, including time-series decomposition and regression modeling to forecast energy demand.

Automated Reporting for Enterprise Systems (HCL Technologies)

- Engineered **Python** scripts to automate the generation of daily and weekly operational reports from various enterprise systems, reducing manual effort by approximately **15 hours** per week.
- Integrated with **PostgreSQL** and **Oracle** databases to extract and aggregate data, ensuring data accuracy and consistency across reports.
- Deployed automated reporting jobs using **Jenkins** pipelines, incorporating error handling and logging mechanisms for robust execution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
