PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented core banking product logic for accounts and interest accrual using a rules-based engine, aligning with double-entry accounting principles and enhancing ledger accuracy.
- Developed integration services and REST APIs connecting core banking systems to downstream payment and data analytics platforms, ensuring robust error handling and retry mechanisms.
- Configured product lifecycle states and financial event schedules, including interest accrual and statement generation triggers, for a digital banking product suite.
- Wrote comprehensive unit and integration tests for financial logic, including edge cases and reconciliation scenarios, to ensure data integrity and auditable postings.
- Collaborated with Product Owners and SMEs to translate complex banking requirements into actionable technical designs for core banking features.
- Troubleshooted production issues within a regulated enterprise environment, focusing on root-cause analysis and developing improved operational playbooks to enhance system stability.

SKILLS

Core Banking Platforms – Thought Machine Vault (equivalent), ledger engines, account logic, deposit products, lending products, fees, interest, limits, delinquency, posting rules, financial controls, operability.

API & Integration Development – REST APIs, integration services, event-driven integrations, pub/sub, streaming, error handling, retries, reconciliation, observability.

Programming Languages – Java, Spring Boot, Python, SQL, R.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD, Jenkins, Git.

Databases & Data Tools – PostgreSQL, MySQL, Oracle, Power BI, DAX, Power Query, R.

Financial Domain – Core banking, payments processing, transaction monitoring, reconciliation workflows, regulatory reporting, audit trails, GDPR awareness.

PROJECTS

Digital Account Management System (HCL Technologies)

- Engineered a Java Spring Boot microservice to manage core account logic, including deposit, withdrawal, and interest calculation functionalities, processing ~1,500 transactions daily.
- Developed RESTful APIs for seamless integration with customer-facing applications and downstream ledger systems, ensuring data consistency across platforms.
- Implemented comprehensive unit and integration tests to validate financial postings and account lifecycle events, reducing post-release defects by **18%**.

Financial Operations Dashboard Enhancement (HCL Technologies)

- Automated data extraction and transformation from PostgreSQL and Oracle databases using Python scripts to populate an operational dashboard, reducing manual reporting time by **15 hours** per week.
- Designed and implemented new Power BI reports and DAX measures to visualize transaction flow monitoring and highlight failed payment messages for financial operations teams.
- Collaborated with business analysts to gather requirements for enhanced reconciliation workflows, improving the team's ability to identify and resolve discrepancies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
