PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python** scripts for data preprocessing and feature extraction on datasets averaging **2.5 million records**, aligning with team instructions for model training.
- Executed and analyzed results from multiple neural network training experiments with varied tuning parameters, summarizing findings for team review and iteration.
- Implemented fixes and changes for identified issues and change requests, committing artefacts to the **Configuration Management database** using **Git** on a regular basis.
- Contributed to the specification, coding, and unit testing of software modules, adhering to **clean coding practices** and guidelines for software unit tests.
- Designed and integrated **Java Spring Boot** REST APIs for cross-service data exchange, incorporating error handling and validation patterns.
- Assisted in the peer review process for software designs and documentation, ensuring alignment with **Software Requirements Specifications** and High-Level Designs.

SKILLS

Programming Languages – Python, C/C++, Java, SQL

Machine Learning & AI – Neural Networks, Generative Models, Computer Vision, ML Training, GPU Programming

Tools & Technologies – OpenGL, Vulkan, Git, Jenkins, Docker, AWS, PostgreSQL, MySQL, Oracle, Splunk, Dynatrace

Frameworks & Libraries – Spring Boot, scikit-learn, pandas, NumPy, Flask, FastAPI

Methodologies & Practices – Agile/Scrum, Clean Coding, Software Design Principles, Unit Testing, CI/CD, Configuration Management

PROJECTS

Neural Rendering Feature Development (HCL Technologies)

- Developed Python scripts to download, prepare, and pre-process large datasets for input into neural rendering models, as instructed by the R&D; team.
- Configured and ran multiple training experiments on neural networks, systematically varying tuning parameters and analyzing performance metrics to identify optimal configurations.
- Documented experimental results and provided clear summaries of findings to the team, facilitating data-driven decisions on model development and refinement.

3D Visualisation Module Implementation (HCL Technologies)

- Implemented core software units for 3D visualisation features, focusing on reusability and extendibility in accordance with software architecture guidelines.
- Wrote and executed unit tests for developed modules, ensuring adherence to specifications and generating test reports for quality assurance.
- Integrated developed modules into the main codebase using **Git**, ensuring code quality through regular commits and participation in code reviews.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
