PROJECTS

Sales Automation Workflow Enhancement (HCL Technologies)

- Engineered a series of **Python** scripts to automate the enrichment of new sales leads with company and contact data from external sources, processing over **1,500** leads weekly.
- Integrated the automation scripts with **HubSpot** via its API, ensuring seamless data flow and reducing manual data entry by an estimated **35%**.
- Developed a **SQL**-based reporting layer to track the success rate and efficiency of the automated enrichment process, providing actionable insights to the sales operations team.

Interactive Sales Performance Dashboard (MSc Data Analytics)

- Designed and built an interactive **Power BI** dashboard visualizing the entire sales pipeline, from lead acquisition to closed deals, for a cohort of **5** simulated product lines.
- Developed complex **DAX** measures to calculate key performance indicators such as conversion rates, sales cycle length, and average deal value, presenting findings to MSc stakeholders.
- Utilized **Power Query** to ETL data from multiple sources, including CSVs and relational databases, ensuring data integrity and consistency for the dashboard's analytical backend.
