PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed production readiness and operational resilience for a suite of enterprise applications, ensuring system availability and performance through proactive monitoring and incident response.
- Developed and maintained **Python** automation scripts for data pipelines and scheduled reporting, streamlining ETL processes and reducing manual intervention by an estimated **20%**.
- Engineered **Java Spring Boot** REST APIs for cross-service data exchange, implementing features and resolving bugs within existing microservices architectures.
- Configured **Dynatrace** and **Splunk** monitoring tools to implement robust logging, alerting standards, and proactive issue detection across critical systems.
- Supported CI/CD pipelines using **Jenkins** and **Git**, facilitating software promotion and implementing operational gating for deployments.
- Participated in **Agile/Scrum** ceremonies, including sprint planning and retrospectives, contributing to defect tracking and feature development via **Jira**.

SKILLS

DevOps & SRE – Site Reliability Engineering, Ansible, Chef, Jenkins, Groovy, shell scripting, Bitbucket, Git, Docker, XLR

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), NGINX, BIG-IP F5, Linux

Networking & Security – gRPC, mutual TLS, SSL handshake, SSH keys, encryption standards, network layers (L1-L7), load balancers, application firewalls

Observability & Monitoring – Dynatrace, Splunk, logging, alerting, incident management, MTTR

Databases & Data Processing – SQL (PostgreSQL, MySQL, Oracle), data warehousing, ETL, data modelling

Programming & Scripting – Python, Java, Spring Boot, REST APIs, shell scripting

Compliance & ITSM – PCI compliance, ITSM processes, regulatory awareness, GDPR, certificate lifecycle management

PROJECTS

Payments Gateway Service Resilience Initiative

- Enhanced the operational resilience of a key payments gateway integration by implementing **gRPC** health checks and automated restart mechanisms for service instances.
- Developed comprehensive **Ansible** playbooks to standardize the configuration and deployment of gateway service components across development and production environments.
- Integrated **Splunk** alerts for key performance indicators and error rates within the gateway service, reducing incident detection time by approximately **30%**.

Automated Compliance Reporting for Financial Operations

- Built a **Python** data pipeline to aggregate transaction logs and operational metrics from various sources for automated compliance reporting.
- Designed and implemented **SQL** queries against PostgreSQL databases to extract and validate data required for regulatory audits and internal risk management.
- Configured automated report generation and delivery via **Jenkins**, ensuring timely submission of operational status and audit trail data to stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
