## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **API Gateway services** using **Scala**, processing approximately 10,000 requests per minute during peak hours.
- Implemented **robust routing and validation logic** within distributed systems, enhancing data integrity for incoming API traffic.
- Contributed to the development of **highly scalable and resilient distributed systems**, focusing on fault tolerance and asynchronous communication patterns.
- Wrote clean, well-documented, and **testable code** for core gateway functionalities, improving maintainability for a team of 4 engineers.
- Diagnosed and resolved production issues within the API gateway layer, including participation in an **on-call rotation** to ensure service reliability.
- Collaborated with multi-functional teams to integrate new API endpoints, ensuring seamless communication between internal services and external clients.

## SKILLS

**Languages** – Scala, Java, Python, SQL, R

**Frameworks & Libraries** – Akka HTTP, Akka Streams, Spring Boot, pandas, NumPy, scikit-learn

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

**Databases** – PostgreSQL, MySQL, Oracle

**Tools & Technologies** – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

**Concepts** – Distributed Systems, API Development, Object-Oriented Design, Algorithmic Thinking, CI/CD, Data Analytics

## PROJECTS

### High-Throughput Transaction Processing Gateway

- Designed and implemented a **Java Spring Boot-based API gateway** to manage inbound transaction messages, handling over 5,000 events per second.
- Developed asynchronous processing flows using **message queues and event streams** to ensure reliable data ingestion and reduce processing latency by 30%.
- Integrated **robust validation and error-handling mechanisms**, decreasing critical transaction failures by approximately 22% in production.

### Automated Data Pipeline and Reporting System

- Engineered a **Python data pipeline** to extract, transform, and load data from multiple enterprise systems for operational reporting.
- Developed **interactive Power BI dashboards** to visualize key performance indicators and provide actionable insights to business stakeholders, supporting a team of 8 analysts.
- Automated the generation of scheduled reports using **SQL queries and Python scripting**, reducing manual reporting effort by 15 hours per week.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
