PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **TypeScript** and **React** components for the Financials Platform, enhancing user experience across millions of users worldwide.
- Authored comprehensive **unit, integration, and system-level tests** that ran seamlessly on the continuous delivery pipeline, ensuring code reliability.
- Collaborated with cross-functional teams on **technical design and architecture** for new UI features, contributing to peer code reviews and knowledge sharing sessions.
- Built **prototypes** to inform and validate the development approach for novel UI features, accelerating decision-making for the product roadmap.
- Engineered **Java Spring Boot** REST APIs for cross-service data exchange, implementing request validation and circuit-breaker patterns to enhance system resilience.
- Supported production enterprise applications using **Splunk** and **Dynatrace**, managing SLAs and responding to P1/P2 incidents to maintain operational stability.

SKILLS

Frontend Frameworks – TypeScript, React, HTML5, CSS, JavaScript

Backend Development – Java, Spring Boot, Python, Node.js, NestJS

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

Observability & Scripting – Splunk, Dynatrace, Python, Shell Scripting

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, pandas, NumPy

Methodologies – Agile, Scrum, CI/CD, Object-Oriented Design Patterns

PROJECTS

Enterprise Financials UI Component Library

- Developed a reusable library of **React** UI components for enterprise financial applications, adhering to UX best practices and ensuring consistency across modules.
- Implemented robust **TypeScript** types and unit tests for all components, achieving over 90% code coverage and reducing integration bugs by approximately 30%.
- Integrated with backend APIs to display real-time financial data, including transaction summaries and account balances, within the new component library.

Automated Data Validation and Reporting Pipeline

- Engineered a **Python** data pipeline to automate the extraction, transformation, and loading of financial transaction data from PostgreSQL and Oracle databases.
- Developed **Power BI** dashboards to visualize key operational metrics and trends identified from the processed data, enabling faster business insights for stakeholders.
- Scripted automated data validation checks within the pipeline, identifying and flagging ~5% of malformed records before they entered downstream reporting systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
