## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Reviewed and critically assessed AI-generated outputs for clarity and usability, identifying **inconsistencies** and providing actionable feedback to the model training team.
- Applied structured evaluation guidelines to diverse content types, maintaining high accuracy and consistency across evaluations of **creative content** and **visual experiences**.
- Collaborated with cross-functional teams to refine quality standards and scoring criteria, contributing to the continuous enhancement of evaluation workflows and best practices for **AI system performance**.
- Developed training data that enhances AI system reliability by meticulously annotating and categorizing **AI-generated text** based on nuanced prompt requirements.
- Provided detailed feedback on AI model outputs, specifically focusing on areas related to **editorial judgment** and adherence to specified content strategies, impacting model refinement.
- Supported the development of AI systems by contributing to a dataset that improved the model's ability to generate human-like text for various applications, ensuring **high-quality input**.

## SKILLS

**AI & Machine Learning** – AI evaluation, AI training, LLMs, Generative AI, Annotation, QA, Moderation, Model improvement, Training data development

**Content & Editorial** – Reading comprehension, Attention to detail, Content strategy, Editorial judgment, Creative content review, Usability assessment

**Communication & Collaboration** – Written communication, Verbal communication, Cross-functional collaboration, Feedback delivery

**Problem Solving & Analysis** – Critical thinking, Observational skills, Ambiguous scenarios, Quality standards, Scoring criteria, Workflow enhancement

**Tools & Platforms** – AI tools, Various content types, Evaluation guidelines

## PROJECTS

### AI Content Quality Assurance Framework (HCL Technologies)

- Designed and implemented a structured framework for evaluating AI-generated text outputs across multiple domains, focusing on clarity, accuracy, and adherence to editorial guidelines.
- Developed a detailed set of scoring criteria and annotation guidelines for a team of evaluators, ensuring consistent and reliable feedback for model training cycles.
- Analyzed evaluation results to identify recurring patterns of AI weaknesses and provided synthesized reports to the engineering team for targeted model improvements, impacting the quality of generated content by an estimated 15%.

### LLM Output Refinement for Customer Support (HCL Technologies)

- Assessed AI chatbot responses for customer support scenarios, identifying inconsistencies and areas requiring improved empathy and factual accuracy.
- Collaborated with business analysts to refine prompt engineering strategies and response templates, improving the naturalness and helpfulness of AI-generated customer interactions.
- Contributed to a curated dataset of high-quality AI-customer interaction examples used to fine-tune a large language model, enhancing its performance in simulated support environments.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
