PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and deployed scalable **AWS infrastructure** using **EC2**, **S3**, and **RDS**, adhering to security best practices and high availability principles.
- Automated infrastructure provisioning and configuration management across multiple environments using **Terraform**, reducing manual deployment time by approximately 40%.
- Developed and maintained operational scripts in **Bash** and **Python** to automate system monitoring, log analysis, and routine maintenance tasks on **Linux** servers.
- Implemented and managed identity and access controls using **AWS IAM** and configured network security with **VPC**, ensuring compliance with organizational security policies.
- Monitored system performance, identified bottlenecks, and troubleshoot issues in real-time using **AWS CloudWatch**, maintaining service reliability for critical applications.
- Collaborated with cross-functional teams in a remote setting to gather requirements and deliver resilient cloud solutions, contributing to the successful integration of new services.

SKILLS

AWS Core Services – EC2, S3, IAM, VPC, RDS, CloudWatch, Lambda

Infrastructure as Code – Terraform, CloudFormation

Scripting & Automation – Python, Bash

Operating Systems – Linux

Databases – PostgreSQL, MySQL, Oracle

Development Practices – Git, CI/CD, Agile/Scrum

Monitoring & Observability – Splunk, Dynatrace

PROJECTS

Automated Cloud Environment Deployment (HCL Technologies)

- Engineered an Infrastructure as Code solution using **Terraform** to provision and manage development and staging environments on **AWS**, including **EC2** instances, **S3** buckets, and **RDS** databases.
- Developed Python scripts integrated with Terraform to automate the setup of monitoring agents and security configurations, reducing environment setup time by 35%.
- Implemented version control for all infrastructure code using **Git** and managed deployment pipelines via **Jenkins**, ensuring consistency and auditability across all infrastructure changes.

Linux System Hardening and Automation Scripting (HCL Technologies)

- Enhanced security posture of production **Linux** servers by implementing hardening scripts and configuring **AWS IAM** roles for application access, reducing potential attack vectors.
- Created a suite of **Bash** scripts to automate log rotation, system health checks, and dependency updates, decreasing manual intervention by approximately 5 hours per week per server.
- Integrated automated alerts into **AWS CloudWatch** to notify operations teams of critical system events and performance deviations, improving incident response times.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
