PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and deployed resilient, scalable cloud infrastructure on **AWS**, managing approximately 50 EC2 instances and associated networking components for a core enterprise application.
- Implemented and optimized **CI/CD pipelines** using **Jenkins** and **Git**, reducing average deployment time by **30%** for Java Spring Boot services.
- Built and maintained containerized applications using **Docker**, orchestrating deployments across a cluster of 8 **Kubernetes** nodes for microservices.
- Automated infrastructure provisioning and configuration management for cloud environments using **Terraform** and **Ansible**, ensuring consistent deployments across development and production.
- Monitored system health and performance across distributed services using **Prometheus** and **Grafana**, enabling proactive issue detection and reducing P1 incidents by **15%**.
- Managed robust access control and secrets handling through **AWS IAM** and integrated **secrets management tools**, enforcing security best practices across development teams.

SKILLS

Cloud Platforms – AWS, Digital Ocean, Azure, GCP

Containerization & Orchestration – Docker, Kubernetes

Infrastructure as Code – Terraform, Ansible

CI/CD & Version Control – Jenkins, Git

Monitoring & Logging – Prometheus, Grafana, Splunk, CloudWatch

Operating Systems & Networking – Linux, System Administration, Fundamental Networking Concepts

Security – IAM, Secrets Management

PROJECTS

Scalable Microservices Deployment Platform

- Engineered a platform for deploying microservices using **Docker** and **Kubernetes** on **AWS EC2** instances, managing cluster state and ingress traffic.
- Developed automated provisioning scripts with **Terraform** to create and configure the underlying cloud infrastructure, reducing manual setup time by **75%**.
- Integrated **Prometheus** and **Grafana** for comprehensive monitoring of microservice health and performance, enabling real-time dashboarding for operational teams.

Automated CI/CD Pipeline for Enterprise Applications

- Built a robust **CI/CD pipeline** using **Jenkins** that automated builds, testing, and deployments for **Java Spring Boot** applications.
- Implemented automated infrastructure updates via **Ansible** playbooks, ensuring consistency and compliance across development, staging, and production environments.
- Managed application secrets securely using an integrated **secrets management tool**, safeguarding sensitive credentials and access keys across the deployment lifecycle.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
