PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Authored **Rust** code reviews for AI-generated solutions, identifying and rectifying errors in **ownership**, **borrowing**, and **lifetime** management for a 3-person team.
- Developed **Python** scripts to automate data extraction and validation for ML training datasets, processing approximately **15,000** records daily.
- Engineered **Java Spring Boot** REST APIs for inter-service communication, improving data retrieval efficiency by an estimated **22%**.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, resolving P1/P2 issues within **4-hour** SLA targets.
- Designed and implemented **SQL** schema changes and optimized queries across **PostgreSQL** and **MySQL** databases for financial reporting workflows.
- Contributed to CI/CD pipelines using **Jenkins** and **Git**, reducing average code deployment time from **45 minutes to 18 minutes**.

SKILLS

Programming Languages – Rust, Python, Java, SQL, R

Rust Ecosystem – Tokio, Actix, Serde, async Rust, ownership, borrowing, lifetimes, traits, generics, pattern matching, error handling

Cloud & Systems – AWS (EC2, S3, Lambda, CloudWatch), Linux, Docker

Databases – PostgreSQL, MySQL, Oracle

Development Tools – Git, Jenkins, Jira, Confluence, Splunk, Dynatrace

Data Analysis & ML – Power BI, Tableau, pandas, NumPy, scikit-learn, DAX, data modelling, ETL

Backend Frameworks – Spring Boot, Flask, FastAPI

PROJECTS

AI Code Analysis & Refinement Platform (HCL Technologies)

- Developed a **Rust**-based analysis engine to evaluate AI-generated code snippets for correctness and adherence to idiomatic patterns, processing over **500** submissions weekly.
- Integrated **FastAPI** to expose an API for submitting code and receiving detailed feedback reports, handling up to **75 requests** per hour.
- Authored pedagogical explanations for common Rust errors, including aliasing and data races, to enhance AI model training data.

Automated Data Pipeline for ML Feature Generation (HCL Technologies)

- Constructed **Python** data pipelines on **AWS Lambda** to ingest and transform raw transaction data into features for downstream ML models, managing approximately **3,000 events/sec**.
- Implemented data validation and quality checks using **pandas** and **NumPy**, reducing data-related model training failures by an estimated **18%**.
- Wrote **SQL** scripts to perform initial data aggregation and cleansing from **PostgreSQL** sources prior to feature engineering.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
