PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for core backend services, handling approximately **1,500 requests per minute** during peak hours.
- Automated data extraction and transformation processes using **Python scripting**, reducing manual reporting effort by an estimated **12 hours per week** for the operations team.
- Managed production incidents and service level agreements for enterprise applications, performing log analysis with **Splunk** and contributing to root cause identification for P1/P2 issues.
- Implemented and refined data validation rules and schema changes in **PostgreSQL** databases, ensuring data integrity for financial transaction records.
- Contributed to CI/CD pipelines using **Jenkins** and **Git** for automated builds and deployments, participating in code reviews to maintain code quality.
- Supported cross-system integrations via REST APIs and database flows between interconnected enterprise business systems, including ERP modules.

PROJECTS

Real-Time Transaction Monitoring System (HCL Technologies)

- Engineered a **Java Spring Boot** microservice to process and monitor incoming transaction messages, identifying and alerting on ~5% of failed payment flows daily.
- Developed automated data enrichment pipelines using **Python** and **PostgreSQL** to add contextual information to transaction records for operational dashboards.
- Collaborated with business analysts to gather requirements for operational alerting and implemented data validation checks to ensure accuracy of monitored transaction data.

Customer Onboarding Workflow Automation (MSc Project)

- Designed and implemented a **Python**-based CLI tool to automate steps in the customer onboarding process for a new analytics platform.
- Integrated the CLI with a mock API simulating customer data ingestion, reducing manual configuration steps by an estimated **40%**.
- Created interactive **Power BI** dashboards to visualize onboarding progress and identify common bottlenecks for internal stakeholders.
