PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Investigated and resolved production issues by querying **Splunk logs** and correlating events across **Java** and **Angular** services, identifying root causes for 3 major incidents.
- Implemented targeted code fixes for confirmed bugs in the **Java Spring Boot** backend, ensuring changes were covered by unit tests and reviewed via **Git** pull requests.
- Built and maintained internal automation scripts using **Python** to streamline repetitive diagnostic steps, reducing average investigation time for common alerts by **15%**.
- Navigated the **AWS** environment, reviewing **CloudWatch metrics** and EC2 instance logs to identify environment-level contributors to production system instability.
- Produced clear post-incident summaries detailing incident timelines, root causes, resolutions, and preventative actions, shared with engineering and operations teams.
- Developed and maintained debugging playbooks in **Confluence** for common production issues, enabling other engineers to resolve recurring problems more independently.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Python, Flask, FastAPI

Frontend Development – Angular, JavaScript, HTML, CSS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases & Data Handling – SQL, PostgreSQL, MySQL, Oracle, Power Query

Observability & Logging – Splunk, Dynatrace, CloudWatch Logs

DevOps & CI/CD – Git, Jenkins, Jira, Confluence

Data Analytics & BI – Power BI, Tableau, DAX, R, pandas, NumPy, scikit-learn

PROJECTS

Production Incident Triage Tooling (HCL Technologies)

- Developed a **Python**-based CLI tool to aggregate and filter logs from multiple services (**Java, Angular**) based on common error patterns, reducing manual log searching time by **40%**.
- Integrated the tool with **Jira** to automatically create tickets for critical errors identified during log analysis, improving defect tracking efficiency for the support team.
- Designed a simple dashboard using **Power BI** to visualize error trends and alert frequencies captured by the Python tool, aiding in proactive issue identification.

Automated Data Validation & Reporting Pipeline (HCL Technologies)

- Engineered a **Python** ETL pipeline to extract, transform, and load data from **PostgreSQL** and **MySQL** databases into a central data warehouse for operational reporting.
- Implemented data validation checks within the pipeline to ensure data integrity, flagging approximately **50-70** anomalous records per week for manual review.
- Scheduled the pipeline execution using **cron** jobs on Linux servers and generated daily summary reports, supporting business analysts in their reconciliation workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
