PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns.
- Developed and maintained **Hibernate** entities and JPQL queries to manage persistence for core application data, ensuring data integrity across the relational database.
- Authored **JUnit** test suites and utilized **Mockito** for mocking dependencies, achieving over **85%** code coverage for new feature development.
- Contributed to sprint planning and technical estimations, providing detailed task breakdowns and effort assessments for upcoming development cycles.
- Participated actively in code reviews, offering constructive feedback to peers and junior developers to uphold coding standards and improve overall code quality.
- Gained exposure to **NoSQL databases** including MongoDB, integrating with it to store and retrieve unstructured data for specific application features.
- Containerized Java applications using **Docker** and managed deployments to development environments, including basic configuration of resource limits.

SKILLS

Languages – Java, Python, SQL, R, JavaScript, TypeScript

Frameworks/Libraries – Spring Boot, Hibernate, Java EE, Spring Security, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle, MongoDB, DynamoDB, MS SQL Server

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Tools/Other – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio, Agile (Scrum/Kanban)

PROJECTS

Java Microservice for Transaction Processing

- Developed a set of **Java Spring Boot** microservices to handle inbound financial transaction messages, focusing on high availability and fault tolerance.
- Integrated **Hibernate** with a **PostgreSQL** database for persistent storage of transaction metadata and processing status, managing schema evolution through migrations.
- Implemented comprehensive unit and integration tests using **JUnit** and **Mockito**, ensuring core processing logic met stringent quality requirements.

Real-Time Analytics Dashboard Back-end

- Built **Java REST APIs** using Spring Boot to expose aggregated operational metrics for a financial services dashboard, serving data to a front-end visualization layer.
- Wrote **Python** scripts to automate the ingestion and transformation of raw transaction logs from diverse sources into a data warehouse schema.
- Configured **Jenkins pipelines** for automated building, testing, and deployment of both Java services and Python ETL jobs to AWS EC2 instances.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
