## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed predictive models for credit risk assessment, including **PD**, **LGD**, and **EAD**, aligning with **IFRS 9** and **IRB** standards.
- Generated macroeconomic scenario forecasts and conducted stress testing analyses, evaluating the long-term impacts of **Climate Change** on credit risk portfolios.
- Performed detailed **segmentation** and **risk segmentation** analyses, contributing to the calibration of risk models for enhanced decision-making.
- Extracted, transformed, cleansed, and analysed complex datasets using **SQL** and **Python**, delivering actionable business insights and recommendations for risk mitigation.
- Contributed to the definition and maintenance of **modelling standards** and methodologies, ensuring consistency and quality across risk analytics initiatives.
- Calibrated risk-based loan pricing models, providing essential data for pricing strategies and profitability analysis.
- Managed and monitored production environments for enterprise financial applications, responding to P1/P2 incidents and ensuring adherence to strict SLAs using **Splunk** and **Dynatrace**.

## SKILLS

**Risk Modelling** – PD, LGD, EAD, IFRS 9, IRB, Stress Testing, Macroeconomic Scenario Forecasting, Climate Change Risk

**Data Analysis & Programming** – SQL, Python, R, Matlab, Pandas, NumPy, Scikit-learn

**Data Management & ETL** – Data Extraction, Data Transformation, Data Cleansing, Data Warehousing, Power Query

**BI & Visualization** – Power BI, Tableau, DAX, Data Modelling

**Software Engineering & DevOps** – Java, Spring Boot, REST APIs, Docker, Git, Jenkins, AWS, Linux

## PROJECTS

### Credit Risk Behavioural Model Development

- Engineered a Python-based feature pipeline to extract behavioural and transactional data from a **~1.5M record** financial dataset for model training.
- Trained and evaluated a **gradient-boosted classifier** (scikit-learn) to predict customer default risk, achieving an **AUC of 0.88** on held-out data.
- Developed a **FastAPI** service to serve model predictions, with input validation and p95 latency under **200ms** for real-time risk assessment.

### Portfolio Loss Provisioning Analysis Tool

- Developed an automated reporting tool using **Python** and **SQL** to perform point-in-time loss provisioning analysis for a loan portfolio.
- Integrated with PostgreSQL and Oracle databases to extract and aggregate loan performance data, generating monthly reports for risk management teams.
- Designed and implemented **Power BI dashboards** to visualize provisioning levels, key risk indicators, and forecast trends, enabling faster business decision-making.

## EDUCATION

**M.Sc. Data Analytics** — National College of Ireland, Dublin

Feb 2026

**B.E. Computer Science** — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
