PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed production incident response for financial services applications, ensuring adherence to strict SLAs and performing root cause analysis for P1/P2 incidents within a **Splunk** and **Dynatrace** environment.
- Automated data extraction and transformation tasks using **Python scripting**, building ETL pipelines that processed approximately 10,000 records daily for scheduled operational reporting.
- Developed and maintained REST APIs using **Java Spring Boot** for cross-system integrations, implementing robust error handling and request validation patterns.
- Executed data preparation and reconciliation processes to support actuarial analyses, ensuring accuracy and completeness of datasets for **Reserving** and **Capital Modelling** teams.
- Contributed to the annual planning process by providing data-driven insights and supporting technical estimations for new product developments.
- Collaborated with stakeholders across Finance and Portfolio Management to gather requirements for new management information reporting processes and enhance existing data structures.
- Containerised Java applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations and basic resource allocation for production environments.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query

Domain Knowledge – Actuarial Science, Data Analytics, Financial Services, Payments Operations, ERP Integration, Regulatory Compliance

PROJECTS

Financial Transaction Monitoring Dashboard

- Developed a Java Spring Boot application to ingest and process transaction data streams, enabling real-time monitoring of payment flows for an enterprise financial services client.
- Built automated reconciliation workflows using Python scripts to identify and flag discrepancies in transaction records, reducing manual reconciliation effort by an estimated 30%.
- Implemented operational alerting mechanisms within the dashboard, notifying relevant teams of failed or stuck payment messages, thereby improving issue resolution times.

MSc Data Analytics Applied Project: Customer Churn Prediction

- Engineered a feature pipeline using Python (pandas, scikit-learn) to extract relevant customer attributes from a dataset of 85,000 records for churn analysis.
- Trained a logistic regression model on the prepared features to predict customer churn probability, achieving an AUC of 0.78 on a held-out test set.
- Created interactive **Power BI** dashboards to visualise churn drivers and model performance, presenting findings to academic stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
