PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **ETL/ELT pipelines** for data ingestion and transformation, processing approximately **1.5 TB of data weekly**.
- Assisted in migrating enterprise data assets to a modern **cloud data warehouse** environment, focusing on schema compatibility and performance tuning.
- Monitored **data quality and reliability** across multiple pipelines, implementing automated checks that reduced data anomaly alerts by **22%**.
- Collaborated with business stakeholders to define requirements for new **reporting and analytics** capabilities, translating needs into technical specifications.
- Contributed to the maintenance of a **modern data warehouse solution**, including performance optimization and schema evolution.
- Learned and applied **best practices in cloud data engineering** and architecture within a collaborative team environment.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes to meet **SLA targets**.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Data Warehousing & ETL – Snowflake, ETL/ELT, Data Pipelines, SQL

Programming & Scripting – Python, SQL

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – DBT, Jenkins, Git, Jira, Agile/Scrum

Observability & Monitoring – Splunk, Dynatrace

PROJECTS

Cloud Data Migration and Pipeline Enhancement

- Engineered Python scripts to automate data extraction, transformation, and loading processes for a large-scale financial services client, handling over **2 million transactions daily**.
- Designed and implemented **ETL pipelines** on AWS infrastructure, integrating with S3 for data staging and Lambda for processing, improving data availability for downstream analytics.
- Collaborated with the client's operations team to validate migrated data sets, ensuring accuracy and completeness prior to decommissioning legacy systems.

Financial Services Operations Dashboard Automation

- Developed Python scripts to automate report generation for transaction monitoring, reducing manual effort by **~30%** for the operations team.
- Created **SQL queries** against PostgreSQL and Oracle databases to extract and aggregate operational metrics for a payments dashboard.
- Supported the production environment by monitoring application logs using Splunk and responding to critical alerts, ensuring system stability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
