## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and operated **scalable, reliable, and secure** internal tools infrastructure on **AWS**, managing compute, storage, and networking components to support product development.
- Automated incident response workflows using **Python scripting**, reducing manual triage time by approximately **40%** and proactively enhancing alert handling.
- Developed and maintained **incident response runbooks** and postmortem documents, contributing to a **15% reduction** in recurring platform issues.
- Collaborated with product development teams to identify and resolve **infrastructure bottlenecks**, improving developer experience and workflow efficiency by enhancing CI/CD pipelines.
- Managed and debugged complex issues within **Linux/UNIX environments**, performing log analysis and implementing shell scripts for system administration tasks.
- Administered and scaled **Kubernetes clusters**, focusing on resource optimization, security hardening, and ensuring high availability for CI/CD tooling.
- Configured and managed **Ansible playbooks** for automated server provisioning and configuration management across a hybrid cloud environment.

## SKILLS

**Languages** – Python, Go, Shell Scripting, Java

**Infrastructure as Code & Orchestration** – Ansible, Kubernetes, Docker

**Cloud Platforms** – AWS, Google Cloud

**CI/CD & VCS** – Jenkins, Artifactory, Gerrit, Perforce, Spinnaker

**Databases** – MySQL, PostgreSQL, MongoDB, Elasticsearch

**Monitoring & Observability** – Grafana, Prometheus, Loki, Tempo, InfluxDB, Thanos, Splunk, Dynatrace

**Operating Systems** – Linux, UNIX

## PROJECTS

### CI/CD Pipeline Automation for Enterprise Applications

- Engineered a robust **CI/CD pipeline** using **Jenkins** and **Docker** to automate the build, test, and deployment of internal Java applications, reducing manual deployment steps by **60%**.
- Implemented infrastructure-as-code practices with **Ansible** to provision and manage development and staging environments on **AWS EC2**, ensuring consistent configurations.
- Integrated **Gerrit** for code reviews and managed branching strategies within **Git**, improving code quality and collaboration among development teams.

### Scalable Monitoring and Alerting System

- Developed and deployed a centralized monitoring stack using **Prometheus** and **Grafana** to collect metrics from distributed services, providing real-time visibility into system performance.
- Configured **ElasticSearch** clusters for log aggregation and analysis, enabling faster root cause analysis for production incidents.
- Scripted data ingestion and alerting rules in **Python** and **Shell Scripting** to proactively identify and respond to system anomalies.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
