PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** REST APIs for a financial-services operations dashboard, handling approximately **3,200 transaction messages** per week and integrating with downstream services.
- Implemented fault-tolerant consumers using **Java** and **JPA** to process inbound payment messages, ensuring data integrity and enabling operational alerting for failed transactions.
- Wrote **JUnit** and **Mockito** tests for new Java features, achieving over **85% code coverage** for critical business logic modules and reducing post-deployment defects.
- Developed and maintained **Python** scripts for automating ETL processes and scheduled reporting, reducing manual data compilation effort by an estimated **15 hours** per month.
- Managed production incidents for enterprise applications on **AWS** using **Splunk** and **Dynatrace**, contributing to meeting strict Service Level Agreements (SLAs) for P1 and P2 issues.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and reducing environment setup time.
- Collaborated with business analysts and operations teams to gather requirements for enhancements to the financial-services dashboard, participating in **Agile ceremonies** and UAT support.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Microservices, Hibernate, JPA, JUnit, Mockito, Maven

Data Engineering & Scripting – Python, SQL, PostgreSQL, MySQL, Oracle, ETL, Data Pipelines, Pandas, NumPy

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Observability & Monitoring – Splunk, Dynatrace

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, RStudio

Enterprise Systems – ERP Integration, Change Management, Jira, Confluence, Linux Shell Scripting

PROJECTS

Enterprise Payments Dashboard Enhancement

- Developed new **Java Spring Boot** microservices to process and enrich transaction data for a financial-services operations dashboard, handling an average of **4,000 messages** daily.
- Integrated a new reconciliation workflow module using **JPA** and **PostgreSQL**, enabling automated matching of **~95%** of incoming payment records.
- Authored comprehensive technical documentation and runbooks for the new services, facilitating smoother handover to the production support team.

Automated Reporting and Data Pipeline

- Engineered a **Python**-based data pipeline to extract, transform, and load data from multiple sources into a data warehouse for operational reporting.
- Built interactive **Power BI** dashboards to visualize key performance indicators and trends derived from the processed data, delivering actionable insights to business stakeholders.
- Automated the generation and distribution of weekly performance reports using **Python** scripting, saving approximately **10 hours** of manual effort per cycle.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
