PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Collected and organized project data including drawings, reports, and specifications for a power-generation EPC project, ensuring accessibility for the engineering team.
- Performed basic engineering calculations for levels, volumes, and quantities, supporting senior engineers in design tasks for an industrial project.
- Assisted in the preparation of technical submittals and tender inputs, contributing to the procurement phase of a large-scale engineering project.
- Participated in field investigations and site observations to monitor construction activities and review QA/QC procedures under direct supervision.
- Raised and tracked basic technical queries (RFIs) with guidance from project engineers, facilitating timely resolution of site-specific issues.
- Supported schedule tracking and progress reporting by maintaining project registers and updating deliverable logs for an ongoing EPC project.
- Containerized a Python-based data processing script using **Docker** and deployed it to an **AWS EC2** instance, enabling automated data aggregation for reporting.

SKILLS

Engineering Tools – CAD tools, Design workflows, Procurement

Project Management – Schedule tracking, Progress reporting, Quantity take-offs, Tender inputs

Data Handling – Data organisation, Project data, Drawings, Reports, Specifications

Technical Skills – Basic calculations, Levels, Volumes, Quantities, Vendor drawings, Technical submittals

Software & Scripting – Python, Docker, AWS EC2

Methodologies – Agile, Scrum, Risk awareness

Professionalism – Teamwork, Communication, Safety, Ethics, Quality, Site support

PROJECTS

Industrial Project Data Aggregation Platform

- Developed a **Python** script to automate the collection and aggregation of diverse project data streams, including technical reports and vendor specifications.
- Implemented data validation checks within the script to ensure accuracy and completeness of collected information before storage in a centralized repository.
- Containerized the Python application using **Docker** for consistent deployment across different environments, supporting the project engineering team's data needs.

Engineering Calculations & Reporting Tool

- Built a modular **Python** application to perform and document standard engineering calculations such as volume and quantity estimations.
- Integrated a simple user interface for inputting parameters and generating formatted reports, aiding junior engineers in design tasks.
- Deployed the tool on an **AWS EC2** instance, providing a accessible resource for the project team to quickly verify basic design figures.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
