PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and operationalized an **AI model evaluation framework** for generative AI and classical ML models, ensuring adherence to accuracy, bias, and explainability standards across multiple production systems.
- Led end-to-end AI model evaluation processes from pilot through production, designing quantitative and qualitative testing methodologies that informed risk assessments and regulatory submissions.
- Managed **LLMOps monitoring** for deployed models, implementing performance dashboards, drift detection mechanisms, and alerts to trigger retraining cycles, contributing to model lifecycle management.
- Produced **governance-ready evaluation reports**, contributing to the bank's AI risk taxonomy and ensuring alignment with evolving regulatory expectations and industry standards for AI trustworthiness.
- Built and maintained **Python-based data pipelines** for extracting and transforming transaction data, supporting analytical needs for financial operations dashboard reporting.
- Containerized **Java Spring Boot microservices** using Docker and deployed them to an AWS EKS cluster, managing CI/CD pipelines through Jenkins for streamlined application delivery.
- Performed root cause analysis for P1/P2 incidents on enterprise applications using **Splunk and Dynatrace**, implementing corrective actions and contributing to SLA adherence for critical systems.

SKILLS

AI/ML Evaluation – Accuracy, Bias, Hallucination, Explainability, Robustness, Ethical Compliance, Generative AI, LLMs, Classical ML, Model Risk Management

MLOps/LLMOps – Performance Dashboards, Drift Detection, Degradation Alerts, Retraining Triggers, Model Lifecycle Management

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, EKS

Programming & Scripting – Python, Java, Spring Boot, SQL, R

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn

Tools & Methodologies – Jenkins, Git, Jira, Confluence, Agile, Scrum, Linux

PROJECTS

AI Model Evaluation Framework Development

- Designed and implemented a comprehensive **AI model evaluation framework**, encompassing testing methodologies for accuracy, bias, and explainability across diverse model archetypes.
- Developed quantitative and qualitative testing procedures for evaluating **generative AI and LLM outputs**, including prompt sensitivity and hallucination detection, for a financial services client.
- Authored documentation and conducted knowledge sharing sessions for internal teams on **responsible AI principles** and the application of the evaluation framework, fostering organizational capability.

Production Support Dashboard Enhancement

- Enhanced an **enterprise Java application support dashboard** by integrating new alerting mechanisms and refining data visualization for transaction monitoring, reducing incident triage time by 15%.
- Wrote **SQL queries** against PostgreSQL and Oracle databases to extract and validate operational data for reconciliation workflows and audit trails, supporting a financial services operations team.
- Automated routine reporting tasks for the payments operations dashboard using **Python scripting**, reducing manual effort by approximately 10 hours per week.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
