PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engineered scalable ELT/ETL data pipelines using **Python** and **SQL** to process and transform large volumes of structured and unstructured data from various sources.
- Architected and maintained seamless data integrations across diverse internal and external data sources, including databases, **APIs**, and enterprise application software.
- Implemented rigorous data integrity and accuracy measures, ensuring strict adherence to financial data regulations, including **SOX compliance** for sensitive datasets.
- Proactively monitored data infrastructure performance, identified and troubleshooted bottlenecks, and optimized systems for maximum scalability and speed.
- Collaborated with data scientists and business analysts to capture requirements and deliver high-quality, curated datasets for analytical and operational use.
- Designed and implemented data models and ELT/ETL pipelines, maintaining comprehensive documentation for clarity and future development.
- Containerised data processing services with **Docker** and deployed them to **AWS EC2** instances, ensuring efficient resource utilization and simplified deployment.

SKILLS

Languages – Python, SQL

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Data Engineering Tools – Snowflake, dbt, Fivetran, SQL Server, Docker

Databases – PostgreSQL, MySQL, Oracle, SQL Server

Programming – Java, Spring Boot, REST APIs

Scripting & Automation – Python scripting, Shell scripting

Methodologies – Agile/Scrum

PROJECTS

Enterprise Data Pipeline for Usage Billing

- Developed a Python-based ELT pipeline to ingest raw usage data from multiple enterprise applications and external APIs into a central data warehouse.
- Designed and implemented data transformations using SQL and dbt models to ensure data accuracy and prepare datasets for consumption-based billing calculations, supporting approximately 15,000 customer accounts.
- Established automated data validation checks and error alerting mechanisms within the pipeline to maintain data integrity and meet stringent regulatory requirements like SOX.

Financial Operations Data Integration

- Built Python scripts to extract and transform financial transaction data from legacy systems and operational databases, integrating them into a unified reporting database.
- Created REST API integrations to pull data from third-party financial services platforms, consolidating critical operational metrics for a payments dashboard.
- Wrote SQL queries to validate data consistency and reconcile transactional flows, reducing manual reconciliation effort by an estimated 20% for the operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
