PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for internal services, handling approximately **1,500 requests per minute** during peak hours.
- Implemented efficient data retrieval and manipulation logic using **JPA and Hibernate**, directly interacting with a **PostgreSQL** database to support core application features.
- Authored comprehensive unit tests using **JUnit**, achieving over **85% code coverage** for new feature development within the Java backend services.
- Designed and deployed interactive **Power BI** dashboards to visualize key performance indicators for operational teams, enabling faster identification of system anomalies.
- Analyzed and transformed data from disparate sources using **Power Query** and DAX, building robust data models for reporting and business intelligence initiatives.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, coordinating response efforts to restore service within defined SLAs.
- Containerized backend services using **Docker** and managed deployments on **AWS EC2** instances, improving consistency across development and production environments.

SKILLS

Languages – Java, Python, SQL, R, DAX

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

BI/Analytics Tools – Power BI, Tableau, RStudio

Observability/Support – Splunk, Dynatrace, Jira, Confluence

PROJECTS

Financial Operations Dashboard Enhancement (HCL Technologies)

- Developed new Java Spring Boot modules to ingest and process transaction data streams for a financial-services operations dashboard, improving data availability for monitoring.
- Wrote complex SQL queries against Oracle and PostgreSQL databases to validate transaction reconciliation workflows and identify data discrepancies.
- Collaborated with business analysts to gather requirements for enhanced operational alerting on failed payment messages, contributing to a **15% reduction** in manual oversight.

MSc Data Analytics - Customer Churn Prediction Model

- Engineered a feature pipeline using pandas and SQL to extract relevant customer attributes from a dataset of approximately **65,000 records**.
- Trained a **scikit-learn** logistic regression model to predict customer churn, achieving an AUC of **0.78** on held-out validation data.
- Visualized model performance and feature importance using RStudio, presenting findings to academic peers and faculty.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
