PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** RESTful APIs for enterprise integrations, handling approximately **1,500 requests per minute** during peak hours.
- Implemented and optimized **Hibernate** queries and data access objects for a core financial services backend, improving query performance by an average of **22%**.
- Authored unit and integration tests using **JUnit** and **Mockito**, achieving over **85% code coverage** for new feature modules in the Java application suite.
- Collaborated with business analysts and operations teams to gather requirements for enhancements to a **payments operations dashboard**, translating needs into actionable development tasks.
- Responded to and resolved P1/P2 incidents for enterprise applications, performing root cause analysis and implementing corrective actions within strict **SLA** targets.
- Automated data validation and reporting processes using **Python** scripts, reducing manual effort by an estimated **15 hours per week** across the support team.
- Containerised several Java microservices using **Docker** and deployed them to **AWS EC2** instances, streamlining the deployment pipeline.

SKILLS

Backend Development – Java, Spring Boot, Hibernate, JPA, REST APIs, Microservices, JUnit, Mockito, Maven

Data Management & Analytics – SQL, PostgreSQL, MySQL, Oracle, Pandas, NumPy, Data Warehousing, ETL, Power BI, Tableau, DAX

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, Shell Scripting

Automation & Scripting – Python, Bash Scripting

Project Management & Support – Agile, Scrum, Jira, Confluence, Incident Management, SLA Management, Change Management

PROJECTS

Enterprise Java Payments Dashboard Enhancement

- Extended a **Java Spring Boot** application to integrate new transaction monitoring capabilities for a financial services client, processing ~4,000 payment messages daily.
- Developed **REST APIs** to expose aggregated transaction status data for real-time display on an operational dashboard, supporting 5 concurrent user sessions.
- Refactored SQL queries within the persistence layer, reducing average load times for critical transaction reports by **18%**.

Python ETL Pipeline for Operational Reporting

- Built a **Python**-based ETL pipeline to extract, transform, and load data from multiple relational databases (**PostgreSQL, Oracle**) into a data mart for reporting.
- Implemented data validation checks and error handling within the pipeline, successfully identifying and flagging over **500 malformed records** per month.
- Scheduled and monitored pipeline execution using **cron jobs** on Linux servers, ensuring timely delivery of daily operational reports.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
