+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained scalable data pipelines using **Python** and **SQL**, processing approximately **2.5 TB** of raw data weekly for consumption by analytical dashboards.
- Designed and implemented data models within **PostgreSQL** to support commercial analytics use cases, improving data retrieval efficiency by **30%** for critical business reports.
- Collaborated with business stakeholders to gather requirements for new data products, translating needs into technical specifications for data ingestion and transformation processes.
- Managed the orchestration of data workflows using **Airflow**, ensuring timely and reliable delivery of curated datasets to downstream analytical tools and platforms.
- Built and maintained **CI/CD pipelines** in **Jenkins** for automated testing and deployment of data pipeline code, reducing manual deployment time by **40%**.
- Authored **SQL queries** to perform complex data wrangling, cleansing, and structuring for various commercial analytics needs, ensuring data accuracy and consistency.
- Containerized data processing jobs using **Docker** and deployed them to **AWS EC2** instances, enabling consistent execution across development and production environments.

SKILLS

Programming Languages – Python, SQL, Java, C++

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Data Engineering Tools – Airflow, Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle, Relational Databases

Data Visualization – Tableau, Looker Studio, DOMO, Sigma

Software Engineering – Agile Methodologies, Scrum, CI/CD, Code Reviews

Productivity Tools – Excel, Google Sheets, Google Suite

PROJECTS

Scalable Data Pipeline for Sales Analytics

- Engineered a **Python**-based data pipeline to ingest and transform sales transaction data from multiple sources, processing over **1.5 million records** daily.
- Developed complex **SQL queries** and data transformations within a **PostgreSQL** database to create aggregated datasets for sales performance dashboards.
- Implemented automated scheduling and monitoring for the pipeline using **Airflow**, ensuring reliable data delivery to business analysts and improving data freshness by **24 hours**.

Cloud-Based Data Warehouse for Customer Insights

- Designed and implemented a relational data model in **AWS RDS (PostgreSQL)** to consolidate customer interaction data from various channels.
- Built ETL processes using **Python** and **pandas** to extract, clean, and load data into the data warehouse, supporting a **3-person** analytics team.
- Created automated data quality checks and alerts using **CloudWatch**, reducing data anomaly detection time by **50%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
