PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed a **web dashboard** for integrating and visualising data from multiple sources, including **API endpoints** and **database extracts**.
- Collaborated with the project team to deliver regular updates and integrate end-user feedback into the **dashboard development** lifecycle.
- Implemented **Python scripts** for data ingestion and transformation, preparing datasets for visualisation and analysis.
- Designed and implemented a **relational database schema** in PostgreSQL to support the data requirements of the new visualisation dashboard.
- Wrote **Python scripts** to automate data extraction and cleaning processes, reducing manual data preparation time by approximately **40%**.
- Contributed to the development of a **REST API** using Flask to serve aggregated data for the front-end dashboard.
- Managed code versions and collaborated on feature development using **Git** and **Github**, participating in code reviews and pull request workflows.

SKILLS

Languages – Python, Java, R, JavaScript, jQuery, C++

Web Frameworks – Django, React, Shiny, Flask

Databases – PostgreSQL, MySQL, Oracle, SQL

Data Science & Analytics – Data Visualisation, Dashboard Development, Data Integration, Data Transformation, Statistical Analysis, Machine Learning

Tools & Technologies – Github, Git, Docker, Unix, REST APIs, Power BI, Tableau, DAX, Power Query

PROJECTS

Cross-Source Data Visualisation Dashboard

- Engineered a dashboard application using **Python** and **Flask** to aggregate and display data from disparate sources, including database tables and external APIs.
- Developed interactive visualisations and summary tables within the dashboard, providing key insights into system performance and operational metrics.
- Integrated user feedback loops to iterate on dashboard design and functionality, ensuring alignment with stakeholder requirements.

Automated Data Pipeline for Analytics

- Built and maintained automated **Python ETL scripts** to extract, transform, and load data from various enterprise systems into a central data store.
- Implemented data validation checks and error handling within the pipeline, improving data accuracy and reducing data-related issues by an estimated **20%**.
- Utilised **SQL** to query and manipulate data, ensuring data integrity and preparing datasets for downstream analysis and reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
