PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for core service interactions, processing an average of **1,500 requests per minute**.
- Developed and maintained **JPA/Hibernate** entities and queries for a critical persistence layer, ensuring data integrity across relational databases.
- Engineered **JUnit** test suites and integrated **Mockito** mocks to achieve **85% code coverage** for new Java modules, reducing post-deployment defects.
- Collaborated with cross-functional teams to define technical requirements and estimate effort for upcoming sprints within an **Agile/Scrum** framework.
- Contributed to the design and implementation of a **TypeScript**-based application, integrating with backend services and consuming RESTful APIs.
- Managed and deployed containerized applications using **Docker** and basic **Kubernetes** configurations on **AWS EC2** instances, improving deployment consistency.
- Provided on-call support for production systems, responding to P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace**.

SKILLS

Languages – Java, Python, SQL, TypeScript, R

Frameworks & Libraries – Spring Boot, JPA, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn, FastAPI, Flask

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, RStudio, data modelling, data warehousing

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace

PROJECTS

Enterprise Backend Service Refactor (HCL Technologies)

- Modernized a legacy Java service by refactoring business logic into a **Spring Boot** application, improving maintainability and reducing technical debt.
- Implemented robust data access layers using **JPA** and **Hibernate**, optimizing queries against a **PostgreSQL** database to enhance read performance by **20%**.
- Developed comprehensive RESTful APIs with clear contracts and integrated them with upstream and downstream systems using **Java**.

Customer Connectivity Integration Platform (HCL Technologies)

- Built **Python** scripts and small services to integrate disparate customer systems with an internal platform, enabling seamless data exchange.
- Developed ETL processes using **pandas** to transform and load customer-specific data formats into a standardized schema for downstream processing.
- Containerized integration services with **Docker** for consistent deployment across development and staging environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
