PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for internal services, handling approximately **4,000 requests per minute** during peak hours.
- Designed and implemented **Hibernate** entities and data access objects for a core data processing module, ensuring robust persistence layer logic and reducing query complexity by **30%**.
- Authored unit and integration tests using **JUnit** and **Mockito** for critical Java components, achieving over **90% code coverage** for new feature development.
- Contributed to the architecture and design of scalable data flows, working with **Python** and **SQL** to process and transform large datasets for analytics.
- Participated in code reviews, providing constructive feedback to junior engineers and ensuring adherence to coding standards and best practices across the team.
- Shipped production-ready code in **Python** and **JavaScript**, focusing on maintainability and performance for client-facing data solutions.
- Containerized microservices using **Docker** and deployed them to **AWS EC2** instances, managing infrastructure configurations and ensuring consistent environments.

SKILLS

Languages – Python, Java, JavaScript, TypeScript, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI, React

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Helm, Terraform, Jenkins, Git, GH Actions

Databases – PostgreSQL, MySQL, Oracle, Snowflake, Databricks

Data & Analytics – Power BI, Tableau, DAX, Power Query, Spark, Polars, Data Warehousing, ETL, Business Intelligence

Healthcare Specific – HIPAA, Data Privacy, Health Data Ecosystem Solutions

PROJECTS

Healthcare Data Pipeline Orchestration

- Engineered a **Python**-based data pipeline on **AWS Lambda** and **S3** to ingest and process patient demographic data, handling approximately **2,500 records per hour**.
- Developed **SQL** scripts to perform data validation and transformation against a **Snowflake** data warehouse, ensuring data integrity for downstream analytics.
- Implemented logging and monitoring using **AWS CloudWatch** to track pipeline performance and identify potential bottlenecks, reducing incident detection time by **40%**.

Patient Data Access Workflow Automation

- Built a **Flask** application with a **PostgreSQL** backend to manage patient data access requests, integrating with internal APIs to retrieve and aggregate records.
- Designed a user interface component using **React** for internal operations teams to track request status and manage workflows, improving operational efficiency.
- Authored technical documentation and ran a training session for the operations team on the new data access workflow, enabling them to manage requests independently.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
