PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Reviewed and assessed **client build requests**, ensuring adherence to internal standards and completeness for timely submission.
- Collaborated with engineering teams to prioritize **build requests** and align on realistic release schedules, improving cross-team coordination.
- Operated internal tooling to generate **client builds and asset patches** for deployment, ensuring smooth integration of new game features.
- Conducted **QA testing on builds** and patches, identifying and resolving bugs prior to release to maintain high-quality player experiences.
- Maintained clear, accessible documentation for all **release procedures** and implemented workflow improvements that reduced ticket resolution time by **18%**.
- Tracked and reported key **release metrics**, identifying opportunities for efficiency gains and contributing to a more streamlined release pipeline.
- Managed incident response for critical production systems, performing **root cause analysis** and implementing corrective actions to restore service within SLA targets.

SKILLS

Release Engineering – Build Management, Asset Patching, QA Testing, Release Scheduling, Release Metrics, Documentation, Workflow Improvement

Development Tools – Jira, Confluence, Git, Jenkins

Programming Languages – Python, Java, SQL

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Operating Systems – Linux, Shell Scripting

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Game Release Pipeline Automation (HCL Technologies)

- Automated the generation and deployment of **client builds and asset patches** for a portfolio of enterprise applications, reducing manual effort by **40%**.
- Integrated **Jenkins pipelines** with Git repositories and artifact management systems to streamline the build and release process.
- Developed Python scripts to validate build configurations and perform initial smoke tests, catching common errors before QA engagement.

Production Support & Incident Management (HCL Technologies)

- Provided L2/L3 production support for enterprise Java applications, responding to P1/P2 incidents and managing service level agreements (SLAs).
- Monitored application health and performance using **Splunk and Dynatrace**, creating custom alerts for proactive issue detection.
- Documented incident resolution steps and contributed to a knowledge base, reducing average incident resolution time by **15%** over six months.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
