PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided **technical troubleshooting** for complex hardware and software issues across Dell's product portfolio, identifying root causes and implementing effective resolutions.
- Acted as a primary **customer advocate**, translating technical issues into clear action plans for end-users and driving timely escalations to engineering teams when necessary.
- Managed a high volume of incoming customer support cases, maintaining accurate **documentation** within the ticketing system and ensuring consistent, closed-loop communication throughout the resolution process.
- Collaborated cross-functionally with **field support, engineering teams**, and distributed Japan-based teams to resolve critical customer issues and improve overall service delivery.
- Contributed to the creation and maintenance of a comprehensive **knowledge base**, authoring detailed technical articles and guides to support continuous improvement of support processes and customer self-service.
- Performed **root cause analysis** on recurring technical problems, identifying systemic issues and recommending process enhancements to reduce future support volume.
- Utilized **diagnostic tools** and remote access capabilities to analyze system logs and configurations, effectively diagnosing and resolving intricate technical challenges for enterprise clients.

SKILLS

Technical Support – Troubleshooting, Diagnostic Tools, Root Cause Analysis, Case Management, Escalation Management, Customer Service, Technical Documentation

Languages – Japanese (Native), English (Fluent)

Operating Systems – Linux, Windows

Programming & Scripting – Python, Java, Shell Scripting

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Jira, Confluence, Jenkins, Git, Docker, Splunk, Dynatrace

PROJECTS

Enterprise Application Support Automation (HCL Technologies)

- Developed **Python scripts** to automate log analysis and system health checks for enterprise applications, reducing manual monitoring effort by approximately 40%.
- Engineered automated alerts using **Splunk** queries to proactively identify and flag critical P1/P2 incidents, enabling faster incident response times for the production support team.
- Created detailed **runbooks** and troubleshooting guides for common production issues, improving the onboarding efficiency for new support engineers by 30%.

Customer Onboarding & Technical Enablement (HCL Technologies)

- Provided direct technical assistance and guidance to enterprise clients during the integration phase of a new **Java Spring Boot**-based financial operations dashboard.
- Developed and delivered technical training sessions to client operations teams on system functionality and troubleshooting best practices, leading to a 15% reduction in basic query tickets.
- Collaborated with business analysts to gather and document technical requirements for feature enhancements based on direct customer feedback and observed usage patterns.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
