## PROFESSIONAL EXPERIENCE

---

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Maintained and troubleshoot large-scale distributed storage environments, ensuring system availability for hundreds of engineers across **PowerScale** and **ObjectScale** platforms.
- Contributed to the design and implementation of new frameworks and tools to enhance the **Continuous Integration Pipeline**, improving release velocity for core storage solutions.
- Developed and refined automated processes for virtual and hardware infrastructure management, directly supporting the daily activities of over **200 engineers** worldwide.
- Implemented company-wide standards and practices for infrastructure security, contributing to the overall quality and integrity of Dell's AI Platform.
- Created solutions that improved the reliability and effectiveness of the software delivery process, reducing manual intervention by **30%** through automation.
- Translated business requirements for system infrastructure into precise technical specifications, guiding the development of new tools and frameworks.
- Managed and monitored systems using **Zabbix** and **Salt**, proactively identifying and resolving failures in large-scale distributed storage environments.

## SKILLS

---

**Languages** – Python, Java, C++, Shell Scripting

**Databases** – PostgreSQL, MySQL, LDAP

**Infrastructure & Cloud** – Linux, Docker, vCenter, AWS (EC2, S3, Lambda, CloudWatch), Kubernetes

**Tools & Platforms** – Salt, Zabbix, Jenkins, Git, Jira, Confluence, PowerScale, ObjectScale

**Methodologies** – SRE practices, Continuous Integration, Agile

## PROJECTS

---

### Distributed Storage Infrastructure Automation

- Developed Python scripts to automate the deployment and configuration of storage nodes within large-scale distributed environments, reducing manual setup time by **40%**.
- Implemented monitoring and alerting using **Zabbix** for critical storage metrics, enabling proactive identification of potential failures and maintaining system health.
- Containerized essential infrastructure management tools using **Docker**, ensuring consistent execution across different environments and simplifying deployment.

### CI/CD Pipeline Enhancement for Storage Solutions

- Contributed to the enhancement of a **Continuous Integration** pipeline using **Jenkins**, integrating automated testing and deployment stages for storage system updates.
- Wrote shell scripts to manage system configurations and perform pre-deployment checks, ensuring adherence to infrastructure security standards.
- Collaborated with the system engineering team to integrate new build and release processes, improving the overall reliability of the software delivery lifecycle for enterprise storage products.

## EDUCATION

---

**M.Sc. Data Analytics — National College of Ireland, Dublin**

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India**

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
