PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java** backend services using **Spring Boot 3**, focusing on microservice architecture and REST API implementation for Clearstream customers.
- Implemented persistence layers using **JPA 2.0** and **Hibernate** for the Custody & Brokerage application, ensuring efficient data management and retrieval from the Oracle database.
- Wrote comprehensive unit tests using **JUnit** and mocking frameworks to ensure code quality and maintainability for new Java features.
- Collaborated with a development team leader to design and deliver new application features, participating actively in **Agile** ceremonies and sprint planning.
- Authored technical documentation and delivered high-quality code, demonstrating problem-solving capabilities in complex application maintenance scenarios.
- Integrated applications with **Jira** and **GitHub**, contributing to CI/CD pipelines managed via **Jenkins** for automated build and deployment processes.
- Containerized application components using **Docker** and managed deployments on Linux environments, ensuring efficient resource utilization.

SKILLS

Languages – Java, PL/SQL, TypeScript, ksh, bash, PowerShell

Frameworks/Libraries – Spring Boot 3, Java EE, JPA 2.0, Hibernate, JUnit, Mocking Frameworks, Playwright, Angular (12+)

Databases – Oracle Database Server

Tools & Platforms – Jira, GitHub, Jenkins, SonarQube, Maven, Artifactory, IntelliJ, Docker, Linux

Concepts – Backend Development, REST APIs, Microservices, CI/CD, Unit Testing, Shell Scripting, AI Model Deployment (SDLC)

PROJECTS

Custody & Brokerage Application Enhancement (HCL Technologies)

- Enhanced a **Java**-based Custody & Brokerage application by developing new features and addressing production bugs, directly contributing to the operational tools used by financial services clients.
- Implemented RESTful APIs using **Spring Boot** to integrate with external systems, improving data exchange efficiency for transaction processing workflows.
- Refactored database access logic, incorporating **JPA** and **Hibernate** for improved performance and maintainability of the persistence layer.

Automated Transaction Monitoring Service (HCL Technologies)

- Built a **Python** service to automate the monitoring of transaction flows within a financial operations dashboard, parsing message data and flagging exceptions for investigation.
- Developed **shell scripts** for automated log analysis and data validation on Linux servers, reducing manual effort in production support tasks by approximately 20%.
- Integrated the service with **Splunk** for centralized logging and alerting, enabling faster incident response times for critical payment processing issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
