PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed, implemented, and maintained network infrastructure solutions for enterprise clients, configuring **routers**, **switches**, and **firewalls** to meet specific operational requirements.
- Performed network monitoring and analysis using tools like **Splunk** and **Dynatrace**, ensuring optimal performance and availability for critical client systems.
- Identified and resolved complex network connectivity and latency issues, reducing average incident resolution time by **18%** through systematic troubleshooting.
- Collaborated with cross-functional teams to integrate network solutions with other IT systems, ensuring seamless data flow and application performance across diverse environments.
- Developed and maintained comprehensive network documentation, including detailed **network diagrams**, configuration standards, and operational procedures for a team of 5 engineers.
- Conducted network capacity planning and made recommendations for network expansion, projecting resource needs based on a **30%** annual growth trend in client data traffic.
- Containerized network management tools and deployed them to an **AWS EKS** cluster, streamlining deployment pipelines and improving resource utilization by **22%**.

SKILLS

Networking Protocols – TCP/IP, DNS, DHCP, VLANs, BGP, OSPF

Network Equipment – Routers, Switches, Firewalls, Load Balancers (Cisco, Juniper, Palo Alto Networks)

Network Security – Firewalls, VPNs, Intrusion Detection/Prevention Systems

Monitoring & Analysis – Splunk, Dynatrace, CloudWatch, Network Monitoring Tools

Cloud Networking – AWS (EC2, VPC), Kubernetes, Docker

Automation & Scripting – Python, Shell Scripting

Documentation & Collaboration – Network Diagrams, Confluence, Jira

PROJECTS

Enterprise Network Infrastructure Design and Deployment

- Designed a scalable network architecture for a multi-site enterprise client, incorporating redundant **routers** and **firewalls** to enhance fault tolerance.
- Configured and tested network segments using **VLANs** and implemented **OSPF** routing protocols to ensure efficient traffic flow across distributed locations.
- Developed detailed **network diagrams** and standard operating procedures for the new infrastructure, facilitating smoother handoff to the client's operations team.

Network Performance Monitoring and Automation Framework

- Implemented a network monitoring solution using **Python** scripts to collect performance metrics from client devices, feeding data into **Splunk** for analysis.
- Automated the generation of weekly performance reports, highlighting key metrics like latency and packet loss, reducing manual reporting effort by **40%**.
- Integrated monitoring alerts with a ticketing system to streamline incident response for network-related issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
