PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Prometheus** and **Grafana** dashboards to monitor capacity availability and system health for production environments, enabling proactive identification of ~15% resource utilization spikes.
- Developed **Python** automation scripts to reduce manual effort in infrastructure provisioning and configuration management, decreasing incident response times by an average of **20%**.
- Collaborated with development teams to define and instrument **SLIs** and **SLOs**, ensuring services met agreed-upon reliability targets and improving overall system quality.
- Participated in on-call rotations, responding to production incidents and identifying observability gaps, contributing to the creation of **10+ new alerts** to detect anomalies.
- Built and maintained **Terraform** modules for managing cloud infrastructure (**AWS EC2, S3**), ensuring consistency and repeatability across development and production environments.
- Supported the CI/CD framework by developing tooling and automation that improved the reliability and quality of code deployments, reducing rollback incidents by **18%**.
- Gathered and analysed operating system metrics using **Splunk** and **Dynatrace** to troubleshoot performance bottlenecks and fine-tune system configurations, reducing p95 latency by **30ms**.

SKILLS

Observability Tools – Prometheus, Grafana, Loki, Tempo, OpenTelemetry, Splunk, Dynatrace

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Infrastructure as Code – Terraform, Ansible, Helm

Containerization & Orchestration – Docker, Kubernetes

Scripting & Programming – Python, Bash, Go

CI/CD & Version Control – Jenkins, Git

PROJECTS

SRE Platform Enhancement for Aviation Client

- Engineered a comprehensive observability platform using **Prometheus** and **Grafana** to monitor key performance indicators for a distributed aviation software system, providing real-time insights into system health.
- Developed automated incident response playbooks in **Python** that reduced manual intervention during P1/P2 events, decreasing mean time to resolution (MTTR) by approximately **25%**.
- Integrated **OpenTelemetry** for distributed tracing across microservices, enabling detailed analysis of request flows and identification of performance bottlenecks within the client's platform.

Cloud Infrastructure Automation for Enterprise Systems

- Designed and implemented **Terraform** configurations to manage the lifecycle of **AWS** infrastructure, including EC2 instances and S3 buckets, for enterprise business systems.
- Containerized key Java Spring Boot services using **Docker**, streamlining deployment processes and improving environment consistency for a financial-services client dashboard.
- Automated routine system checks and reporting using **Bash** scripting, reducing the time spent on manual operational tasks by **~3 hours per week**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
