PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained production-grade **Java Spring Boot** microservices, focusing on building **RESTful APIs** for internal data aggregation, ensuring consistent data retrieval for downstream reporting.
- Engineered **Python scripts** to automate ETL processes, extracting data from disparate sources, transforming it for consistency, and loading it into a central data warehouse, reducing manual data processing time by **~40%**.
- Managed and optimized **PostgreSQL** database schemas and queries for enterprise business systems, implementing indexing strategies that improved report generation performance by **15%** on average.
- Designed and implemented **CI/CD pipelines** using **Jenkins** and **Git** for automated build, test, and deployment of Java applications, reducing deployment cycle time by **30%**.
- Participated in **Agile ceremonies**, including sprint planning and daily stand-ups, contributing to technical estimations and ensuring timely delivery of features and bug fixes within development sprints.
- Containerized **Java applications** using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits and networking for predictable performance during rolling updates.
- Analyzed system logs and performance metrics using **Splunk** and **Dynatrace** to troubleshoot P1/P2 incidents, reducing mean time to resolution (MTTR) for critical production issues by **~22%**.

SKILLS

Languages – Java, Python, SQL, R, Bash

Frameworks & Libraries – Spring Boot, Spring, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI, NestJS

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, Jira, Confluence

BI & Data Analytics – Power BI, Tableau, DAX, Power Query, RStudio, Data Warehousing

Operating Systems – Linux, Windows

PROJECTS

Enterprise Java Application Modernization (HCL Technologies)

- Re-architected legacy Java components into modular **Spring Boot microservices**, focusing on improved maintainability and scalability for core enterprise functions.
- Integrated a new **Hibernate**-based persistence layer to manage complex data relationships within the financial services dashboard, ensuring data integrity across transaction processing workflows.
- Developed comprehensive **JUnit** test suites and utilized **Mockito** for mocking dependencies, achieving over **85%** code coverage for critical service modules.

Automated Reporting System for Operations (HCL Technologies)

- Built an automated **Python** data pipeline to extract, transform, and load operational metrics from multiple systems into a central repository, generating daily performance reports.
- Designed and implemented **SQL** scripts to validate data integrity and perform reconciliation checks on processed transaction flows before report generation.
- Deployed the reporting service on **AWS Lambda**, triggered by scheduled events, to ensure efficient and cost-effective execution of the data processing and reporting tasks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
