PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Gathered, cleaned, and validated data from multiple enterprise sources, ensuring accuracy and consistency for downstream analytical reporting using **Python** and **SQL**.
- Developed interactive **Power BI** dashboards and reports, translating complex data into actionable insights for business stakeholders, leading to a **15%** improvement in decision-making speed for key operational metrics.
- Analyzed large datasets to identify trends, patterns, and performance insights across business units, employing statistical methods and data modeling techniques.
- Tracked key performance indicators (KPIs) and generated regular updates for senior management on business performance, highlighting areas for strategic focus.
- Collaborated closely with cross-functional teams, including business analysts and operations leads, to understand data requirements and deliver timely analytical solutions.
- Performed ad-hoc data analysis and query optimization using **SQL** against relational databases (PostgreSQL, MySQL, Oracle) to support business investigations.
- Containerized analytical applications using **Docker** and deployed them to cloud environments, ensuring efficient resource utilization and scalability.

SKILLS

Data Analysis & Visualization – Power BI, Tableau, DAX, Power Query, R, RStudio, Statistical Methods, Data Modeling, Data Warehousing, Exploratory Data Analysis, A/B Testing, Time-Series Analysis

Programming & Scripting – Python, pandas, NumPy, scikit-learn, SQL, Java, Spring Boot, Flask, FastAPI

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Shell Scripting

Databases – PostgreSQL, MySQL, Oracle

Development Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum, REST APIs

PROJECTS

Customer Business Performance Dashboard (HCL Technologies)

- Developed a comprehensive **Power BI** dashboard to visualize key performance indicators for enterprise customers, providing insights into transaction volumes and processing times.
- Engineered data extraction and transformation pipelines using **Python** and **SQL** to aggregate data from disparate sources into a unified data model for reporting.
- Collaborated with internal business stakeholders to define reporting requirements and ensure the dashboard accurately reflected critical business metrics, supporting strategic planning.

MSc Applied Data Analytics Project

- Conducted exploratory data analysis and applied statistical modeling using **R** and **Python (pandas, scikit-learn)** on a large dataset to identify factors influencing customer churn.
- Built and evaluated predictive models, including a logistic regression classifier, achieving an **AUC of 0.78** on held-out validation data to forecast customer attrition.
- Designed and presented interactive visualizations in **Tableau** to communicate model findings and actionable recommendations to an academic review panel.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
