PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python**-based ETL pipelines for data ingestion and transformation, ensuring reliability and consistency across daily batch processes.
- Managed pipeline housekeeping and monitoring jobs, effectively troubleshooting and resolving data and pipeline issues to maintain stable operations.
- Integrated disparate systems by developing and managing **REST APIs**, ensuring reliable data movement between internal and external platforms.
- Wrote and managed **Python scripts** for data ingestion, transformation, and automation, contributing to the evolution of existing data workflows.
- Collaborated with stakeholders to gather requirements for data solutions, translating business needs into practical technical implementations.
- Documented technical processes and data workflows clearly for both technical and non-technical audiences, improving knowledge sharing across teams.
- Containerised **Python applications** using **Docker** and deployed them to **AWS EC2** instances, managing configuration and resource allocation.

SKILLS

Languages – Python, SQL, Java

Data Engineering – ETL Pipelines, Data Workflows, Data Ingestion, Data Transformation, Data Validation, Data Warehousing

Cloud & DevOps – AWS, Docker, Git, Jenkins, CI/CD

APIs & Integration – REST APIs

Automation Tools – Power Automate, Power Apps, N8N

Databases – PostgreSQL, MySQL, Oracle

Other – ERP Systems, Linux, Jira, Confluence

PROJECTS

Python ETL Pipeline for Financial Data Processing

- Engineered a robust **Python ETL pipeline** to process and transform large volumes of financial transaction data, handling approximately 15,000 records per hour.
- Implemented error handling and retry mechanisms for failed data loads, ensuring data consistency and reducing manual intervention by 40%.
- Integrated the pipeline with **PostgreSQL** for storing transformed data, facilitating downstream reporting and analysis.

API Integration for Enterprise System Data Sync

- Developed a **REST API** integration service in **Python** to synchronize master data between an ERP system and an internal CRM platform.
- Managed the deployment and monitoring of the API service on **AWS Lambda**, ensuring high availability and low latency for data synchronization operations.
- Created comprehensive documentation for the API endpoints and integration patterns, enabling seamless adoption by client-side development teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
