PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed production support for enterprise Java applications, responding to P1/P2 incidents within strict SLAs and analyzing logs using **Splunk** and **Dynatrace** to identify root causes.
- Developed Python scripts to automate ETL processes for scheduled reporting, transforming and validating data across disparate sources before loading into target databases.
- Designed and implemented REST APIs using **Java Spring Boot** for new feature development, integrating with existing microservices and ensuring backward compatibility.
- Wrote and optimized complex **SQL** queries across **PostgreSQL** and **Oracle** databases for data extraction, validation, and ad-hoc reporting requests from business teams.
- Collaborated with cross-functional operations teams to gather requirements for enhancements to a financial-services operations dashboard, supporting UAT and post-implementation triage.
- Containerized Java Spring Boot applications using **Docker** and deployed them to **AWS EC2** instances via **Jenkins** CI/CD pipelines, managing code reviews and Git branching strategies.
- Facilitated change-control management for enterprise business systems, coordinating user acceptance testing and providing post-go-live support for system configuration updates.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Hibernate, JPA

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Monitoring & Observability – Splunk, Dynatrace

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query

Methodologies – Agile, Scrum

PROJECTS

Enterprise Payments Operations Dashboard Enhancement

- Developed new Java Spring Boot microservices to process and enrich inbound transaction messages for a financial-services operations dashboard, improving real-time visibility for **transaction monitoring**.
- Wrote Python scripts to automate data reconciliation checks between upstream and downstream systems, reducing manual effort by approximately **20 hours** per week.
- Implemented robust error handling and alerting mechanisms using **AWS CloudWatch**, ensuring timely notification for over **3,000** critical payment processing failures monthly.

Data Analytics & Reporting Automation (MSc Project)

- Built interactive **Power BI** dashboards visualizing key performance indicators from sales and operational data, enabling stakeholders to track progress against targets.
- Designed and implemented data models in Power BI using **DAX** and **Power Query** to support complex analytical requirements and ad-hoc data exploration.
- Performed exploratory data analysis using **Python** (pandas, NumPy) and statistical methods to identify trends and insights for a capstone business intelligence project.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
