PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented Python-based ETL pipelines for data ingestion and transformation, processing approximately **2TB** of raw data weekly into a structured format for analytics.
- Developed and maintained **Java Spring Boot** microservices, creating RESTful APIs that handled over **5,000 requests per minute** for internal enterprise systems.
- Engineered a **Python** script to automate the generation of daily operational reports, reducing manual effort by **15 hours** per week and improving report delivery accuracy.
- Collaborated with cross-functional teams to integrate **AI solutions** into GM's business strategies, focusing on building core infrastructure components for AI/ML workflows.
- Implemented **robust, high-performance software systems** with a focus on scalability and efficiency, contributing to the deployment of AI-driven applications across global platforms.
- Contributed to technical initiatives in validation, deployment, and monitoring of **AI integrations** in real-world environments, working with diverse data sources and SaaS platforms.
- Containerized multiple Java microservices using **Docker** and deployed them to an **AWS EKS** cluster, configuring Kubernetes deployments and services for improved scalability and resilience.

SKILLS

Languages – Python, Java, SQL, R, Bash

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, FastAPI, Flask

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, EKS), GCP, Azure

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Splunk, Dynatrace, Linux

AI/ML Concepts – Machine Learning, Deep Learning, Statistical Modelling, Natural Language AI, AI Infrastructure

PROJECTS

Enterprise AI Infrastructure Development

- Built core infrastructure components for AI/ML workflows using **Python** and **FastAPI**, enabling efficient data processing and model deployment for enterprise applications.
- Designed and implemented API integrations with diverse data sources and SaaS platforms, orchestrating workflows through internal and third-party tools to support AI initiatives.
- Containerized AI services with **Docker** and managed deployments on a **Kubernetes** cluster, ensuring scalability and reliable operation of ML-driven applications.

ML Model Deployment Pipeline (HCL Technologies)

- Developed a **Python** pipeline to extract and transform features from large datasets (**~500GB**) for machine learning model training, improving data readiness for analytics.
- Trained a **scikit-learn** classification model on transactional data, achieving an **AUC of 0.82** on a held-out validation set for anomaly detection.
- Packaged the trained model into a REST API using **Flask**, enabling real-time inference for downstream applications and reducing prediction latency by **40%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
