PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **agentic AI systems** for conversational interfaces, enabling autonomous user and system interaction.
- Developed and optimized **LLM-powered agents** capable of reasoning, decision-making, and task execution, contributing to next-generation AI applications.
- Engineered and scaled **AI pipelines** for real-time and asynchronous interactions, ensuring high throughput and low latency.
- Wrote clean, maintainable **Python code** and comprehensive unit tests for new AI features, adhering to software engineering best practices.
- Collaborated with **AI researchers and senior engineers** to integrate state-of-the-art AI technologies into production systems.
- Optimized **AI models and workflows** for performance and scalability on cloud platforms, reducing processing times by an average of **18%**.
- Containerized AI services using **Docker** and deployed them to managed Kubernetes clusters on **AWS**, ensuring reliable and scalable operation.

SKILLS

AI/ML Frameworks – TensorFlow, PyTorch, Hugging Face, scikit-learn

Backend Development – Python, Java, Spring Boot, REST APIs, Microservices

Cloud Platforms – AWS, GCP, Azure

AI Concepts – Conversational AI, Generative AI, LLMs, Agentic AI, NLP, Prompt Engineering

Tools & Methodologies – Docker, Kubernetes, Jenkins, Git, Agile, CI/CD

PROJECTS

Generative AI Chatbot for Customer Support (HCL Technologies)

- Developed a conversational AI agent using **Python** and **LangChain** to handle customer inquiries, integrating with a **vector database** for efficient knowledge retrieval.
- Fine-tuned a pre-trained **LLM** on customer interaction data, improving response accuracy by **15%** and reducing average handling time.
- Designed and implemented prompt engineering strategies to enhance the agent's ability to reason and execute tasks, achieving a **92%** success rate on simulated customer queries.

AI-Powered Data Pipeline Orchestrator (HCL Technologies)

- Built a scalable **Python**-based pipeline for processing and transforming large datasets for ML model training, handling over **5,000 data points per second**.
- Integrated with **AWS Lambda** and **S3** for data ingestion and storage, ensuring cost-effective and reliable data management.
- Developed monitoring and alerting mechanisms using **CloudWatch** to ensure pipeline stability and data integrity.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
