PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot REST APIs** for core financial services, handling an average of 5,000 requests per hour.
- Implemented **Hibernate/JPA persistence layers** for enterprise applications, managing complex object-relational mappings and database interactions.
- Designed and coded **JUnit and Mockito test suites** for Java components, achieving over 85% code coverage for critical business logic.
- Participated in **code reviews** for a team of 4 engineers, ensuring adherence to coding standards and identifying potential performance bottlenecks.
- Contributed to **sprint planning and technical estimation** sessions, breaking down complex features into manageable development tasks.
- Containerised multiple **Java applications using Docker**, streamlining deployment processes and improving environment consistency across development and production.
- Managed **CI/CD pipelines using Jenkins** for automated builds, testing, and deployments, reducing manual intervention by approximately 40%.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Linux, Power BI, Tableau

PROJECTS

Enterprise Payments Dashboard Enhancement

- Extended a **Java Spring Boot-based payments operations dashboard** with new modules for enhanced transaction monitoring and alerting.
- Developed **new RESTful endpoints** to integrate with upstream financial messaging systems, processing approximately 2,000 message types daily.
- Wrote **SQL scripts for data validation** and schema adjustments in PostgreSQL, ensuring data integrity for operational reporting.

Automated Reporting Service

- Created a **Python-based ETL service** to extract, transform, and load data from multiple enterprise systems into a central data store.
- Scheduled and automated data ingestion and report generation using **Python scripts and cron jobs** on a Linux environment, delivering weekly reports to business analysts.
- Implemented data quality checks and error handling within the **Python data pipeline**, reducing data discrepancies by 15%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
